Biographical/Historical Note:

The present department of Planning, Design and Construction has evolved over time from the office of Superintendent of Buildings & Grounds which was created about 1920. This office has grown and changed with the campus over time. In 1965 a Coordinator of New Construction position appears on the organization chart reporting through the Director of Buildings & Grounds and the Physical Plant Administrator to the Vice President of Administrative Affairs. On the 1969/70 chart it has become the office of New Construction & Planning. By 2000 it has been renamed Construction Management and becomes Construction Services about 2002. The 2005/06 telephone directory has a listing for Planning, Design & Construction.

Description: Blueprints, drawings and plans of WKU buildings and campus created by the Department of Planning, Design & Construction. The plans described here have been appraised and will be made available to all researchers. Plans for existing buildings may be housed in WKU Archives, but they will not be pulled for the general public.

Dates: 1906-present
