Race Plank Indorsed By Southern Democrats

Washington, D. C., Sept. 17—Southern Democrats in Washington today warmly commended the plank on the race question placed in the Maryland Democratic platform last night through the initiative of Senator Gorman. Shortly after the Senator returned from Europe last month he was quoted as saying that the negro question was now one of the most important before the country, and the reiteration of this view in the shape of a State platform has lent new interest to the matter. Maryland leading off with such a pronounced view on the question is thought by many to mean that the next national Democratic platform will also give attention to the subject and force the Republicans to take up the issue.

With the exception of President Roosevelt, Representative Crumpacker of Indiana and a few others the Republicans as a party are averse to agitation, as was clearly shown in the last Congress, through the fail-

ure of Representative Crumpacker to obtain action on any of the several measures he introduced. The same is true of the Republican party in Maryland today. It wants the negro vote, of course, but it realizes that the most damaging plank in the Democratic platform is the denunciation of the alliance between the Republicans and the negroes.

It is already apparent that the Republicans in the next session of Congress will say as little as possible about the negro question. There is, however, very good authority that in the session of Congress following the presidential election Representative Crumpacker may be given an opportunity to have his views enacted into law. In fact, southern Democratic members of Congress, without exception, believe that the re-election of Roosevelt will mean attempted legislation having for its object the reduction of the south's electoral vote as a punishment of those states which have sought to eliminate the ignorant negro votes.

A LETTER.

I visited the Bowling Green Academy Friday morning. The opening exercises, conducted by the teachers, were heartily joined in by the pupils. I was impressed with the earnestness of the teachers and the interest of the pupils. Of the forty pupils thus far enrolled on the two we have completed our common school course. One finished last week. If no other arrangements were made or contemplated for pursuing further their education the pupils who completed our eight grade work could find places in this academy. The course of study is an excellent one, handsomely complementing the work of the last grade in our public school. The principal, Rev. R. L. Hyde, and Prof. Wm. C. Orton, are efficient and painstaking. I desire to urge upon the parents of the pupils who completed our public school last session to continue the education of their children and I recommend the Bowling Green Academy.

The following pupils completed the eight grade work last session and hold certificates:

- Hessie Starks
- Willie Jackson
- Mary Granger
- Beulah Haskins
- Eva Loving
- Walter Jones
- Chas. Blakey
- Charlie Price

Senator Hoar and Booker T. Washington

At a picnic near Salem, Mass., the other day the venerable U. S. Senator Geo. F. Hoar made an address in which he advised a kindly and forbearing spirit on the new issue, saying:

"I know, my friends, that there are special difficulties in this problem as it affects our colored fellow citizens. I know how deeply moved are the feelings of our southern brethren. I would not utter towards them a word of reproach. I know how near to their homes and how close to social and political life comes this cloud and shadow.

"I see that one enthusiastic southern gentleman has renewed the proposition that we shall send 10,000,000 negroes out of the country. This is totally impracticable. Let us not delude ourselves. We have got this question to meet squarely at home. The negro will stay. The European and Asiatic will come. You cannot turn them out and you cannot keep them out."

JOHN TEMPLE GRAVES.

Here is a sample of John Temple

Philadelphia, Sept. 18.—Over 10,000 persons attended tonight's session of the Colored Baptist convention at the National Exposition building. Booker T. Washington and the Rev. Dr. Dean Richmond Babbitt, of New York, Washington addressed himself to the church delegates and in the course of his speech said:

"Bishop Chandler, of Georgia, struck, in my opinion, the heart of the race question a few days ago, when he said that each race should try to correct the evils among its own people, and that the white race should cease abusing the negro at long range, and that the negro at the same time should cease his cross-fire at the white man. It will be to our interest in every manly straightforward manner to cultivate the friendship of people among whom we live."

"Mob is a Wild Beast."

Rev. A. S. McArthur, pastor of the Calvary Baptist church, New York City, has vigorously denounced lynching and anarchy. In the course of his sermon, he said:

A mob is a wild beast. A mob has no brain to think, no heart to feel and no reason to judge, between right and wrong. When Democracy becomes mobocracy the days of the republic will be numbered.

"Mob law is one of the greatest dangers in a republican form of government. It is anarchy, pure and simple. It is vastly more dangerous in a republic than in a monarchy; it resolves society into savagery. It brutalizes and demoralizes all who participate in it. It puts brute force in the place of law and vengeance in the place of justice. It is treason to the republic and a dishonor to humanity.

"Ours is the only country on the globe that roasts at the stake men uncondemned and untried. There is not a spot today in darkest Africa or in any other pagan land where such atrocities are committed.

"We must insist that officers of the law shall be fearless in the defense of their prisoners even though they be guilty of the most awful of crimes, in order to do so they may have to shoot to kill. No man who knows my spirit will charge me with cruelty in feeling or action."

OCTOBER RALLY.

We call special attention of the churches in the city to our October rally which is to be on the second Sunday in October, the 11th, 1903.

We ask our friends and all lovers of the cause of Christ to help us in this struggle. We had planned to raise \$400 on that day which would clear us of debt. But our clubs have gotten somewhat disorganized and we cannot hope to raise that amount, but we shall try now to raise \$250. We shall expect our members to do their best, and also pastors and members of the city churches as we have been prompt to respond to the call of all other churches in the city. There will be three services, morning, afternoon and evening.

A Good Man Gone.

Mr. Chas. Hinton, who had been ill for a long time, died last Monday at 7 o'clock p. m., at his home in Delaware. Brother Hinton was one of our best known citizens and was loved and admired by all who knew him. He was a member of the New Bethel Baptist church. He professed a hope in Christ about nine years ago and since that time he has lived a consistent Christian and devoted member of his church doing what he could to promote the best interest of his church and the cause of his master.

He will be greatly missed in his community and especially at his church on Sunday mornings, for he was regularly at his post in church at all the Sunday services unless hindered by sickness.

A wife, four sons, four daughters, two brothers and a host of friends to mourn his death.

Of these Willie Jackson is taking advanced work in the academy and Georgie Jones is reviewing her past work. I do not know the plans of the rest; but they will not be out of place to say that the rest are apt and promising students and there should be no neglect in their education. It should be pursued until finished. Certainly it should not be considered as now complete. It is encouraging to know that several of our young people will enter Tuskegee, Fisk, Normal and Walden.

But many who desire to go forward with their education are either not ready yet or will not find it convenient to leave the city. In either case the Bowling Green Academy may be patronized to great advantage. Many pupils intend to take advanced work in the fall and can meanwhile do preparatory work in the academy. I have written us to the parents concerned because I feel an interest in the intellectual welfare of their children.

THE FORUM.

The Forum met last Sunday afternoon at the First Baptist church. The Stateist, choir rendered a beautiful selection, prayer by Rev. J. Evans. After another selection the minutes of the previous meeting were read and adopted. After this the president presented Miss Mary P. question to meet squarely the issue. The negro will stay. The European and Asiatic will come. You cannot turn them out and you cannot keep them out."

JOHN TEMPLE GRAVES.

Here is a sample of John Temple Graves' oration on the "Mob Spirit in the south." "The problem of the hour is not how to prevent lynching in the south, but the larger question, how shall we destroy the crime which has always provoked and always will provoke lynching?"

"The mob answers it with the rope, the bullet and sometimes, God save us, with the torch, and the mob is practical; its theory is effective to the largest degree; the mob is today the sternest, the strongest and the most effective restraint that the age holds for the control of rape."

"The masses of the negro are not afraid of death in a regular way. They love display and the spectacular element of a trial and execution appeals to their imagination.

"There is no real remedy but one, and that is the separation of the races."

This pyrotechnic language was poured in to the ears of the distinguished men and women who recently gathered at Chautauqua to consider the increase, cause of, and the remedy for the mob spirit, feuds, riots, etc. One thing is certain, Mr. Graves' oration does not voice the sentiment of the intelligent, patriotic white people of this country. Already several prominent journals have rebuked him and a distinguished white bishop has perceived a "serious danger in Chautauqua sensationalism."

To say the least the speech of Mr. Graves was illogical and sensational; contrived and constructed to catch the ear by its bold and startling utterances.

God be thanked that in this age the masses, who are the power and the

our interest in every manly straightforward manner to cultivate the friendship of people among whom we live."

RECEPTION AT OAKLAND, KY.

You may remember Sunday, July 12, 1903. Eight clubs under the names of states, with a young lady at the head of each as governess, had a contest rally with the understanding that the state which raised up the largest amount of money that the other seven could not equal would have a grand reception.

The state of Kentucky, of which Miss Virgie Lewis was governess raised the largest money, which amounted to \$15. Tuesday night, Sept. 22 the reception was given and it was a grand occasion. Miss Lewis was escorted to the table by the seven governesses of the other states, followed by the members of her state, Kentucky, and Rev. Keeton, of Bardonia, Mrs. J. E. Kuykendall, the public school teacher of Oakland. All were marched around a table 15 feet long, which was loaded with everything nice and they eat to their fill. At 10:30 p. m. the state of Kentucky, headed by her governess, retired to their homes, feeling that they had been highly honored for their faithful work.

Rev. Keeton and Mrs. Kuykendall spoke on the occasion, giving honor to whom honor was due, saying that the occasion was grand.

Miss Virgie Lewis is a coming young woman.

There is yet plenty of room in our public school building for more pupils and there are yet more pupils at large about the homes and on the streets who should be occupying this room.

There are very few acceptable reasons why these out-of-school children should not be in school. The school will furnish books to pupils unable to purchase them. Parents withholding their children from school for little or no cause are committing an offense against their own families, their neighbors, the race, the state and their God. No parent is excluded or excusable; it is the duty of every parent or guardian to educate his children.

TRY FOR A KINGFISH.

There is Lots of Fun to Be Had in Tussles with the Black Bass of the Sea.

"Speaking of game sea fish," said the angling doctor, according to the New York Sun, "reminds me that you seldom hear much about the kingfish. He is more nearly the prototype of the freshwater black bass than any native of the sea, so far as my experience goes.

Like the same symmetrical body, the same untiring spirit and the same angler an equal amount of sport. He seldom attains to the weight of his freshwater congener. In near by waters it is unusual to hook a kingfish of more than two pounds, but every ounce in those two pounds is firm, hard flesh and muscle.

"No sooner does the hook penetrate his tough mouth than there is action at his end of the line. The difference in strenuousness of fish is never more accurately demonstrated than when a kingfish is hooked on weakfish grounds. One or two lunges and the weakfish is towed to the landing net; but after five minutes' play the kingfish still retains the vigor and muscle which he exhibited when he first took the hook.

"The kingfish is always found on a sandy bottom. Sometimes he resembles the fluke in his secretive habits. He will lie in the loose sand at the point of a bar in a tide way, completely submerged in the sand except his eyes, which are continually on the alert for the food brought along by the tide. Sometimes the kingfish chooses the breakers for a feeding ground, and they are frequently caught from the Coney Island and Rockaway piers.

GOOD ENOUGH.

While the red rose leaves do carpet
All the paths my feet do tread,
While the trumpet blooms are flaming
'Gainst the dark tree overhead;
Whilst my memory stays with me,
Of the good times I have had,
I'll be glad to stay in this world,
For it isn't half so bad.

While nights come again like last night,
And the oxe-eyed daises bloom
In the meadow 'neath the hillside,
And I breathe their faint perfume,
And a memory walks with me
Of a maid, and of a day,
That the yester-year held for me
I'll be happy on the way.

With a tousle-head to meet me,
And to trot home by my side,
I can laugh misfortunes from me,
Meet the morrows happy-eyed;
With her yellow curls uplifting
To each gentle vagrant breeze—
Pshaw! I'd like to live forever
When I get her on my knees!

Long as there be those who love me—
Life will be well worth the while!
Long as baby hands reach to me,
Long as lips curve in a smile,
And are lifted up for kisses,
Just so long I'll happy be!
Just so long will this old footstool
Be quite good enough for me!

BREAKING THE JAM

By FRANK T. MANN

"I WILL do it!" Tom Harding turned from the door, where he stood hesitating, and a look of resolution, that visited his blue eyes only at rare intervals, mingled with the misery in them. "When a man's wife tells him to his teeth that he is a shiftless, drunken creature, and that she regrets the day she first laid eyes on him, then, I take it, that man has little to live for and nothing to lose. Anyway, I shall accept Squire Johnson's offer, let come what may."

He reached into the pocket of his faded, threadbare coat, and drew forth a crumpled sheet of paper. Slowly, for the fifth time, he went over the words printed in large, flaring letters, the ink not yet dry:

"What do you mean, Bobbie Carson? Have I heard what?"

"About Tom. He's undertook to cut the jam above the mill, an' mos' ever'body says he'll be killed. S'posed you knew about it." And swelling over the importance of his message, the thoughtless urchin galloped off his way.

For a minute or more Margaret stood looking blankly across the street through the dashing rain. Every bitter word she had uttered that morning recurred to her mind in all its cruel strength, and seemed to burn itself in on her very soul in great red letters of fire. The look, half of anger, half of sad reproach, with which he had turned from her and kissed the baby sleeping quietly in its crib—every incident of their quarrel returned with a significance magnified a thousandfold by her fears.

"I called him worthless and drunken," she said, with dry eyes and pale, trembling lips, "and he is neither. Poor Tom! Though he does drink sometimes, it is through discouragement and disappointment at his hard lot and he is always kind to me. Oh, God! if I could recall my words! But is it too late? I may save him yet?"

The Curtis Lumber Company's mills stood on the level below the river and the river and about 100 yards from it. Half a mile above the mills the railroad crossed the river over a long iron bridge, and from a point just below the southern end of the bridge an artificial ditch had been cut to float the logs into the mill at high water. It was this bridge and the ditch that were responsible for the trouble which now revaled.

Au Sable river was roaring, booming, yellow flood. All day the great sawlogs, broken from their moorings above, had been rushing by in thousands. But now immense pine trees torn up by their roots, were borne upon the bosom of the raging torrent. One of these monarchs of the forest had caught between the two middle piers of the ridge, and formed the nucleus of a rapidly growing mass of timber and debris, the long stems of the great pines writhing and rolling together like the hideous forms of gigantic serpents. Not only was the bridge threatened with momentary destruction, but the dam thus formed caught the waters up and hurled them and their ponderous armature down the ditch and against the mills below, with a violence that must soon accomplish the destruction.

To get at the pin trunk and cut it would release the raining, tumbling mass, restore the running waters to their natural channel, and save the bridge and

... fellow a chance to assume a natural appearance in the water, while hooking him through the body destroys all his chances for movement.

"The kingfish seems to be a fellow who does not require companionship. He does not herd with his fellows, as do the blue and weakfish, and it is seldom that the angler fills his basket with kingfish alone. Still, they all have a liking for sandy bottoms and the surf, and where one is caught there are sure to be several in the vicinity.

"As a food fish the king is universally conceded to be a delicacy."

Four-Dollar Cigars.

Those who have attended the big banquets at Delmonico's, such, for instance, as the one given to Cyrus Field upon the completion of the Atlantic cable, and which cost \$50 a plate, had the privilege of smoking the choicest Havana cigars, costing, perhaps, 50 cents each. But what would the dinner cost with cigars at \$4 a piece? Yet there are such cigars being made in Havana to-day, and some have arrived in New York. Francisco E. Fonseca, a friend of President Palma, and who was born near where he lived in Cuba, received one of these a few days ago. It was wrapped in a piece of imported Japanese rice paper and inclosed in a handsomely decorated box. In fact, only one comes in a box, and each is sixteen inches long and an inch and a quarter in diameter at the middle. It is said that the tobacco can only be grown on one plantation in Cuba, and the duty on each is 68 cents.—N. Y.

Woman Composer.

... of all women composers, yet short-ly she frankly used to think but I have should not s ever s des- an ide

... it better than he. Then the recollection of his wife's bitter words returned with full force, and he hesitated no longer. "Maggie is a good woman in most things," he said to himself, and the blue eyes glistened, "and maybe I haven't done by her what I might. For her sake and the baby's I'll try it."

"Well, Tom, my man, you will undertake to cut the jam and save the mills?" said President Johnson a moment later, as Tom, hat in hand, stood before his desk. "Do you know that it is a dangerous piece of work? There is probably not another man in Alcona county who would run the risk for twice the sum named. Indeed, it was not so much with the hope of saving the mills as it was a formality to secure our insurance rights that the reward was offered. However, if your mind is made up it is not my place to dissuade you. If you are successful the money is yours, and I will add another hundred from my own private purse."

"And if anything happens to me, the money will be paid to—my wife?"

William Johnson was a kind-hearted man, and as he watched the big, childish lumberman move toward the door a suspicious film blurred his vision for a moment, and there was just the least huskiness in his tones as he bade him God-speed.

"Poor fellow," he murmured, as he turned to his work, "life has not been all smooth with him lately, and he is in a great measure responsible for his own misfortunes, but I should greatly regret if any evil were to befall him at this work."

In the smaller of the two scantily furnished apartments that constituted their home, Margaret Harding busted herself in the preparation of dinner. Glancing at the cracked porcelain clock on the mantel, she quit her work for the twelfth time, and going to the door, looked uneasily down the long, muddy street. It was deserted save for one solitary figure that came bounding along as fast as his short legs could carry him, regardless alike of the slush of mud and snow beneath his feet and the gusts of wind and rain which came near upsetting him at intervals.

"Say, you hearn?" he gasped, as he dashed up to where Margaret stood,

... an eye not cognizant of his terrible danger the sturdy lumberman might have been following his daily vocation or anything in his look or manner that denoted the contrary.

But the woman, dild-eyed and panting, with hair disheveled and hanging in rain-soaked tresses down her back, who just now joined the group on the bank, realized his danger and a piercing shriek mingled with the roar of the waters.

"Oh, Tom, dear Tom, come back to me! Forgive my cruel words, and come back—for baby's sake and mine!" and she held the little, shivering thing up in full view of its parent out on the river.

He heard not her words, but he saw his child, and everything vanished before the paternal. He returned and looked at the towering mass above him, and for a moment those on shore hoped he might escape. But the net! A terrible grinding crash, as the great tree parted, an awful, muffled roar, and for a single instant the lumberman's form stood poised on the broken tree. He kissed his hand ones, and above them came the words, "It was for you, Maggie; you and the baby," and then he went down, and was borne away by the rushing swirl of waters.

Half an hour later searchers found a limp, unconscious body suspended to the branches of a tree where it had been left by the now receding waters. It was at first thought that the man was dead, but closer examination revealed the fact that he breathed, and a liberal draught from a lumberman's flask forced down his throat partly restored him to consciousness. That night Tom Harding was carried home to his wife, terribly maimed and bruised, it is true, but still alive. Under her tender and happy ministrations he finally recovered, and from his terrible experience he gleaned a lesson that will last him all his life. To-day not a happier trio live than Tom and Margaret and their boy.—Farm and Fireside.

"Black bass tackle is eminently suited to them, but the hook should be a small Sproat bend and the line should be linen, as silk rots very quickly in salt water. The favorite bait for kingfish is shedder crab or shrimp. Indeed, shrimp is a universal salt water bait.

"Some fishermen make the mistake of using a hook that is too large, and by using the hook look like a pin wheel. The most successful salt-water fisherman of my acquaintance uses only two shrimp. He hooks these through the tail.

"Of course, so small a bait as a shrimp does not conceal the hook. The old notion of absolutely concealing the hook has been long done away with by expert anglers. The main point is to present your bait in the most natural form to your prospective victims. Hooking a shrimp through the tail gives the little fellow a chance to assume a natural appearance in the water, while hooking him through the body destroys all his chances for movement.

"The kingfish seems to be a fellow who does not require companionship. He reached into the pocket of his faded, threadbare coat, and drew forth a crumpled sheet of paper. Slowly, for the fifth time, he went over the words printed in large, flaring letters, the ink not yet dry:

ONE THOUSAND DOLLARS REWARD.

To the person who will break the jam collecting in Au Sable river two miles above Curtis before damage is done to the lumber mills at that point I will pay one thousand dollars. All risks of fire and theft to be borne by the one securing the reward.

W. L. JOHNSON, President Curtis Lumber Company.

Thrusting the paper into his pocket, Tom strode hurriedly down the sloppy sidewalk, and in a few minutes stood before the large brick building which contained President Johnson's office. A wave of indecision swept across his face as he scraped the mud and snow from his well-worn shoes. It was a perilous undertaking, and none knew the danger of it better than he. Then the recollection of his wife's bitter words returned with full force, and he hesitated no longer. "Maggie is a good woman in most things," he said to himself, and the blue eyes glistened, "and maybe I haven't done by her what I might. For her sake and the baby's I'll try it."

To get at the pin trunk and cut it would release the raining, tumbling mass, restore the raging waters to their natural channel, and save the bridge and the mills. But woe to him who cut it!

When Tom Haring, ax in hand, stepped upon the bridge and started on his mission, not one of the group who stood looking on in breathless silence but felt that he was witnessing a tragedy.

"The man is committing sheer, downright suicide," said an old lumberman who had spent his life in the forest and on the river. "It oughtn't to be allowed."

But Tom had already reached the middle of the long structure, and was feeling his way down over the tumbling, grinding pile as only a lumberman can. Now he stood with careful footing upon the huge pine stem, bending under the awful strain, and now he led his ax with telling vigor, making the chips fly at each powerful stroke. To an eye not cognizant of his terrible danger the sturdy lumberman might have been following his daily vocation or anything in his look or manner that denoted the contrary.

He turned and looked at the towering mass above him, and for a moment those on shore hoped he might escape. But the net! A terrible grinding crash, as the great tree parted, an awful, muffled roar, and for a single instant the lumberman's form stood poised on the broken tree. It is Thoroughly Well Built and is Cool in Summer and Comfortable in Winter.

A poultry house over 400 feet long has been built by W. J. Kirwin, of Middlesex county, Mass., who keeps several hundred head of Barred Plymouth Rocks. The house, which faces the south, is 12 feet wide, seven feet high in front and four feet in the rear, with a shed roof that slopes one way. It is thoroughly well built and has an extra protection during cold nights of a mus-

Chinaman's Repartee.

The editor of the Chinese Daily World, published in this city, is a graduate of Yale, and while retaining all the characteristic reticence of his race he is, nevertheless, rather clever at repartee, as was recently instanced when a rather dapper young fellow called at the World office to sell a certain grade of paper. The editor affects the American style of dress, and the paper house drummer thought he would be smart and opened the conversation by impudently asking: "What kind of a nese are you—Japanese or a Chinese?" The editor smiled blandly, and with a courteous bow retorted: "Before I answer your inquiry will you kindly inform me what kind of a key you are, and tell me if you are a monkey, a donkey or a Yankee?" TRAITS OF SIAMÈSE ANTS.

Insects Have Characteristics Hitherto Unknown to the Scientists.

A new trait possessed by ants has been discovered by a French traveler in some of the insects he found on his journey through Siam. These creatures were very small, of a gray color and lived in damp places. They traveled often and in troops, which seemed to be under the direction of a commander, who rode on "horseback." M. Meissen, the Frenchman who noticed this peculiarity, was attracted to these groups by discovering that each company contained a large ant that traveled more rapidly than the others. Observing them more closely, he noticed that each large ant always carried a small gray ant upon his back, though the remainder of the troops were on foot. This mounted ant would ride out from the line, travel swiftly along the column from head to rear and apparently overlook their maneuvers. M. Meissen concluded from what he saw that this species of ant, while on its travels, is under the direction of a commander, though such "ant horses" as the general rides must be rare and valuable, for he scarcely ever found more than one mounted ant in a colony.

GRATEFUL, HAPPY WOMEN

Miss Muriel Armitage.

Thank Pe-ru-na for Their Recovery After Years of Suffering.

Miss Muriel Armitage, 33 Greenwood Ave., Detroit, Mich., District Organizer of the Royal Templars of Temperance, in a recent letter, says:

"I think that a woman naturally shrinks from making her troubles public, but restored health has meant so much to me that I feel for the sake of other suffering women it is my duty to tell what Peruna has done for me.

"I suffered for five years with uterine irregularities, which brought on hysteria and made me a physical wreck. I tried doctors from the different schools of medicine, but without any perceptible change in my condition. In my despair I called on an old nurse, who advised me to try Peruna, and promised good results if I would persist and take it regularly. I thought this was the least I could do and procured a bottle. I knew as soon as I began taking it that it was affecting me differently from anything I had used before, and so I kept on taking it. In six months, and in ten months, and in a year, and in health, and in fifteen bottles I considered myself entirely cured. I am a grateful, happy woman to-day."—Miss Muriel Armitage.

Peruna cures catarrh of the pelvic organs with the same surety as it cures catarrh of the head. Peruna has become renowned as a positive cure for female ailments simply because the ailments are mostly due to catarrh. Catarrh is the cause of the trouble. Peruna cures the catarrh. The symptoms disappear.

Female Weakness is Pelvic Catarrh.

Always Half Sick are the Women Who Have Pelvic Catarrh.

Catarrh of any organ, if allowed to progress, will affect the whole body. Catarrh without nervousness is very rare, but pelvic catarrh and nervousness

work without the greatest exhaustion. This is a very common sight and is almost always due to pelvic catarrh.

It is worse than foolish for so many women to suffer year after year with a disease that can be permanently cured.

Peruna cures catarrh permanently. It cures old chronic cases as well as a slight attack, the only difference being in the length of time that it should be taken to effect a cure.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a

PROFIT IN CAPONIZING.

A Simple Operation and Some Reasons Why It Pays the Farmer to Perform It.

The chief reason for caponizing cockerels is to get a larger profit out of them. Good capons generally sell for a higher price per pound than other poultry. They also weigh more, and are marketed at a time when the flock is bringing little return. A flock of capons are quiet, do not crow and are easily taken care of.

The best breeds to caponize are the medium-sized varieties, such as Plymouth Rocks, Wyandots, Rhode Island Reds, etc. The Asiatics do not give as satisfactory results unless kept until they reach maturity, when they are so large as to be beyond the reach of private families. It does not pay to caponize smaller breeds, for they do not produce dressed fowls of the highest quality. Capons are usually marketed at from six to 12 months of age, and the market for them opens soon after the holidays.

The best time to caponize is when the cockerels are three to four months old. At this age the operation can be performed with less danger than when the birds are older and larger. A bright, sunny day must be chosen for the operation and the birds must have been fasted for at least 24 hours previous. A special set of instruments are necessary for this purpose, and the work requires skill and care. One may easily acquire the skill by practicing on a few dead birds.—Orange Judd Farmer.

An Old Soldier's Experience.

Dennard, Ark., Sept. 7th.—Mr. E. J. Hicks, merchant of this place, has written for publication, an account of a personal experience, which is very interesting.

"I am an old Federal Soldier," writes Mr. Hicks, "and shortly after the close of the war I was taken sick. I had aches and pains all over me, fluttering of the heart and stomach trouble. I just simply was never a moment without pain. I could not sleep at night, and I was always tired and fearfully weak.

"I took medicine all the time, but for a long time I was more dead than alive. Altogether I suffered for over twenty years, and I believe I would have been suffering yet, or in my grave, if I had not read of Dodd's Kidney Pills.

"I got an Almanac, which told me of this remedy, and I bought some of it. I started with three pills a day, but increased the dose to six pills a day. I had not used many till my pains began to disappear. I kept on, and now I can sleep and eat as well as ever. I could, and I feel like a new man, with no pains or aches left.

"I will always recommend Dodd's Kidney Pills, for they are a wonderful remedy."

The newly elected president of the great corporation hurried home, dashed into the library and seized a pen.

"Don't let anybody disturb me!" he said to his wife.

For several hours nothing broke the silence save the scratching of the presidential pen across the paper. Sheet after sheet was filled with writing and laid aside. The perspiration rolled from the presidential brow and ink was splattered all over his shirt front. Finally he laid aside the pen, leaned back and heaved a sigh of relief.

"What on earth have you been doing, dear?" asked his wife.

"I have been performing my first work since being elected president of the Consolidated and Amalgamated United States Pig Iron company," said he.

"What is it?" "I have been preparing for the press the rules I have followed and by which I have worked my way from obscurity to my present high position. I have noticed that this is about the first thing the newspapers have about the men who are selected to manage big institutions."

Fertilizers on Farms.

That the fertilizer trade has grown to enormous proportions is shown by the figures given for the year 1899. In that year the total expenditure for fertilizers in the United States was \$54,783,757, or about \$10 per farm. This was about 1.2 per cent. of the value of all farm products. The outlay for fertilizers increased 42 per cent. in the decade 1890 to 1900. Sugar farms spent an average of \$280 for fertilizers. For some other classes of farms the figures were: Nurseries, \$69; florists' establishments, \$51; vegetable farms, \$38; tobacco farms, \$27; fruit farms, \$22; rice farms, \$13; coffee, cotton and dairy farms, \$11; hay farms, \$6; stock farms, \$5.

Remarkable Machine.

The potato planter of to-day would make the farmer of a generation ago sit up and rub his eyes. It requires that the potatoes be supplied, but will do all the rest on its own initiative. It picks the potato up and looks it over—or seems to—cuts it into halves, quarters or any desired number of parts, separates the eyes and removes the seed ends. It plants whole potatoes or parts thereof, as desired, as near together or as far apart as the judgment of the farmer on the driving part suggests. Having dropped the seed it covers it, fertilizes it, tucks it in like a child put to bed and paces off the next row with mathematical accuracy.—Philadelphia Press.
