Appendix B

Here is the post-census enrollment management report for Spring 2020. Official enrollment is 2215, which is -114 compared to Spring 2019.

Several factors contributed to this enrollment decrease. Drops in resident enrollment (-148), along with smaller declines in foreign (-28) and nonresident (-43) students, were not offset by an increase in military enrollment (+99), while other classifications were flat. Within the resident population, the Kentucky counties showing the greatest change were Warren (-102), Hardin (-23), and Fayette (-13), with the largest increases seen in Ohio (+5), Oldham (+7), and Jefferson (+17) counties. The decrease in foreign student enrollment (-28) was less than the last two years (2017 to 2018, -109; 2018 to 2019, -51).

From a degree-level perspective, the largest decrease was in master's enrollment (-129), while the largest increase was in non-degree enrollment (+24). Each academic college had fewer enrolled students (declines ranged from -44 to -14). Enrollment dropped both for part-time (-76) and full-time (-38) students.

Note: this report uses unduplicated headcount, which counts each student only in their primary program/department. This predominantly affects certificate program enrollments, as certificates tend to be secondary programs. If you need more specific information about duplicated headcount (i.e., students simultaneously enrolled in multiple programs), please let me know.
