Dear Faculty Member:

Associated Students will be sponsoring an Environmental Teach-In on April 20-22. The Teach-In is designed to complement the National Environment Teach-In which is set for April 22.

We are inviting students, faculty, towns-people, and other interested citizens to participate in our program.

The Environmental Teach-In will consist of an afternoon and evening program for the three days of April 20-22. Afternoon sessions will be from 5 to 3 p.m. and night programs will be from 7 to 10 p.m. in the Ballroom of the Paul L. Garrett Student Center.

Included in the afternoon sessions will be Mr. Leon Jaroff, science editor of Time magazine; Mr. David C. Short, staff attorney for the Kentucky Air Pollution Control Commission; and a representative from General Motors in Detroit. Other state, regional and national leaders in environmental services will appear; schedules are enclosed.

The night sessions will include symposiums conducted by Western faculty members. Topics presented and discussed will include "Man, Environment, and Population, Sociological Problems for Over-Crowding, Politics of Population, Local Pollution Problems, Air Pollution, and Environmental Crisis of the Seventies."

We would appreciate your announcing and emphasizing the Environmental Teach-In to your students. The program will provide information about our environmental problem, a vital area that concerns all citizens.

The three-day teach-in is designed to recognize the existing ecological and population problems of our total environment, to provide information and a forum for discussion concerning the nature of these problems for citizens of Western and the entire Bowling Green area.

The entire program is designed to educate and inform citizens of the grave problem of pollution of the environment.

Your efforts in informing students about the opportunity of the program will be appreciated. Please feel free to call me at 745-4354 for any additional information.

Sincerely,

David Porter, Vice President
April 20-22

PROGRAM SCHEDULE FOR ENVIRONMENTAL TEACH-IN
