Bowling Green, Ky., July 30, 1929

Messis. W. C. Bell, Sternett Cuthbertson, E. B. Bassetts, M. O Hughes, M. B Harris.

TO

Members of the Board of the Regents of the Western Teachers College.

. I have pleasure in submitting the following report of the Western Teachers College for the year 1928-1929. I am handing to each of you a copy of this report and hope you will as soon as time permits give it a careful reading and an earnest study.

The institution is enjoying an unusual success. A careful study of its activities will show that'it has never served so abundantly as it is now. Never has its spirit been better, its work of a higher grade or its outlook more optimistic.

SPECIAL AND CURRENT APPOROPRIATIONS SINCE 1906

I give below the special and current appropriations made by the ^General Assembly for each year since the establishment of the institution. A carefully study of the following will show a really wonderful development in the maintenance and permanent development of College Heights.

| NO. OF DIFFEREN | T STUDENTS | | | |
|-------------------|------------------|--------------------------|-------------------|---|

THEANNUAL AUDIT

1 11

WE GIVE BEGINNING ON THE FOLLOWING PAGE, THE ANNUAL AUDIT OF THE BOOKS OF THE WESTERN TEACHERS COLLEGE MADE BY ESCOTT, BARRETT & COMPANY, PUBLIC ACCOUNTANTS AND AUDITORS, OF LOUISVILLE, KENTUCKY. THE REPORT MADE BY THIS COMPANY IS MOST INTERESTING. IT COVERS FRACTICALLY ALL OF THE DETAILS IN-CLUDING BALANCE SHEETS, A STATEMENT OF OPERATIONS, STATEMENT OF CASH RECEIPTS AND DISBURSEMENTS, VALUATION OF BUILDINGS AND EQUIFMENT AND MANY OTHER THINGS. THIS AUDIT IS SO COMPLETE THAT I HAVE FOUND IT UNNECESSARY TO PUT INTO MY RE-GULAR REPORT MANY ITEMS I WOULD OTHERWISE EMBODY IN IT. IT COVERS ALL OF THE FISCAL YEAR CLOSING JUNE 20, 1929. Louisville, Kentucky, July 15, 1929.

To the

Board of REGENTS

WESTERN KENTUCKY STATE NORMAL SCHOOL & TEACHERS COLLEGE

GENTLEMEN:

As arranged, we have conducted a detailed audit of the books and records of your institution, covering the fiscal year ending June 30th, 1929,- a report of which follows:

As a part of this report-

| Exhibit 1 | Balance Sheet- June 30th, 1929 |

ANALYSIS OF BALANCE SHEET

RESOURCES

CURRENT ASSETS

CASH IN BANKS

\$41,907.91

Represented by balances in-

American National Bank-Genl. A/c.04,694.09"""Boarding Home a/c36,515.99Citizens National Bank-Genl.479.43Bowling Green Trust Co.41,905.11

DISCREPANCEY

Represented by* Lost check charged back by B.GTr.Co.3.00 Unlocated error Am. Natl Bank B.H. a/c20 2.80

Verification was accomplished by reconcilement with statements furnished by banks.

CASH IN OFFICE

Represented by fund carried in office to provide for petty disbursements, as verified by proof count.

It is noted that dishonored checks to the amount of \$226.25 are carried in this account, several of which are apparently uncollectible, and it is suggested that such items as are considered worthless, be charged to Profit & Loss account, thus clearing the account of "Dead" material.

NOTES RECEIVABLE

This balance represents-Notes taken for Boarding Home Accounts 1,626.80 Notes taken in connection with sales Re.Es5,195.00

Of the former classification, it is noted that no collections have been made during the past year, - an indication of a rather hopeless condition, and it is suggested, that if further efforts prove ineffective, this account be charged to Profit & Loss Account. Both classes of notes are reported in detail in ^Schedule D.

WORKING ASSETS

22,774.16

6.821.80

Represented by Materials, supplies live stock, etc., as appearing separately upon Balance Sheet. These balances have been established by inventories taken under the supervision of department managers, and are believed to accurately represent their respective condition. \$500.00

CAPITAL ASSETS

Represents your investments in Land, Roadways, Buildings R.R. Spur and automobiles.

In order to condense for Balance ^Sheet purpose, the ledger valuations covering various ^Buildings and wquipment, are reported in detail in ^Schedule C which reflects original costs, plus additions and improvements. It is noted that the additional investment in buildings during the past year amounted to \$272,587.23,-^Equipment investments for the same time amoginted to \$43,907.15, while improvements on Roads and Landscaping cost \$55,175.01.

These expenditures are in accordance with the General scheme for completing your plant organization, as approved by the authorities. Protection against less by fire or other casualties is secured by policies issued by representative Companies, as summarized in Schedule E.

DEFERRED DEBIT ITEM

PREPAID INSURANCE

Represents the proportion of insurance premiums paid in advance, which is chargeable to future operations.

LIABILITIES

CURRENT LIABILITIES

AUDITED VOUCHERS PAYABLE-GENERAL

BOARDING HOME

Represents vouchered accounts covering purchase of Materials, Services. etc., as vertified throughout.

NOTES PAYABLE

Represents by accomodations procured from Banks, as follows: Feb.28, 1929 Citizens Natl. Bk \$20,000.00 June 28, 1929 11 11 10,000.00 July 10, 1929 Apr. 30,1929 " 10,000.00 July 10, 1929 11 11 Apr. 30, 1929 11 11 11 15,000.00 July 9, 1929 8,000.00 July 10, 1929 June 9, 1929 11 11 11 Apr. 30, 1929 " 10,000.00 Junt 28,1929 11 11 Feb. 10, 1929 Mch. 30, 1929 American " "" 25,000.00 July 28, 1929 11 30.000000 July 15, 1929 May 31, 1929 -128,000.00

The abnormal amount of this character of the indebtadness, was caused by the State Treasurer meeting his obligations with warrants instead of cash, necessitating your realizing needed funds by borrowing upon pledges of warrants as collateral.

7,084.26

8.398.03

128,000.00

0,001.16

5,557.72

FUNDED DEBT

15,000.00

75,000.00

Represents an issue for First Mortgage Bonds, guaranteed by the State of Kentucky

Under Legislative Act, the interest upon these bonds is paid by the State Treasurer, as well as a reduction of principal at the rate of \$5,000.00 per annum

DONATIONS

Represents donations received from Citizens of Bowling Green, which have been set up in a separate account to perpetuate a record of their generosity.

TRUSTEES INVESTMENT

1,782,709.07

Represents a balancing account against net assets, and is the accumulation of funds received from all sources, as reflected in the various forms of investment in permanent improvements.

Each succeding year has been increased enhancement of the natural beauty of your hill-top location,- and the additional buildings,-symmetrical in design,-convenient and adequate for their requirements-all contributing to the rapidly increasing activities in promotion of education, and there should be real satisfaction felt by your Board, in surveying the Great increase in the influence and accomplishments of your institution.

BOOKS AND RECORDS

The accounting system in use is modern and adequate to your requirements, and the clerical work is of highest efficiency.

The scope of this audit included verification of receipts-preper distribution thereof,-and final deposit in Bank.

Disbursements were verified by comparison of cancelled checks with Cash book entries,-vouchers with invoices,-and correct recording of, and distribution to proper accounts.

Transactions in connection with activities in Athletics are carried in separate records, installed for that purpose two years ago.

A separation of funds is maintained, and deposits and disburesments are made through a special bank acccount, opened for that purpose.

A detailed checking of all transactions resulted in an exact verification of the books records which show results of operations as follows:

| | RECEIPTS | EXPENSES | |
|---|----------|-----------|-------------------|

This detailed audit anables us to cerify that y ur affairs are properly and promptly handled by your accounting department, and that all funds received have been properlay accounted for,-disbursements have been made after approval of invoices or other forms of indebtedness, and the accompanying statements, as drawn from your records, constitute a true report of operations, and the condition of your affairs on June 30th, 1929.

We acknowledge the uniform acurtesy extended to us during the course of this audit.

Respectfully submitted

ESCOTT BARRETT & CO.

SCHEDUALE E

ANNUAL REPORT OF TEACHING STAFF AND COURSE OF STUDY

8 2

I submit below a carefully prepared report by Dr. Finley Grise, Dean of the Institution, concerning the teaching staff and the Course of Study.

My dear President Cherry:

I am handing youwherewith my annual report on the teaching staff and course of study of Western Kentucky Teachers ^College for the year 1928-29.

GENERAL STATEMENT

As you know, our institution has been a member of the Americal Association of Teachers Colleges since 1924, and of the Association of Kentucky ^College since 1926. We were admitted to full membership in the Association of Colleges and Secondary Schools of the Southern States in 1926. Our school is rated as an A-Grade institution by all these accrediting agencies.

At the time of our 1927 report to the American Association, we were failing to meet three of the standards of that organization. This was the largest possible number of standards which an institution can fail to meet and still be rated as an A-Grade college. The standards on which we were below at that time were the following:

- 1. Standard relative to the size of classes.
- 2. Standard relating to amount expended on library.
- 3. Standard setting dorth the acsdemic qualification of the teaching Staff

Within the year 1926- 29, we have met the standards as regards sixe of classes and the support of the library. We are still below the standards of the association as regards the academic training of our faculty. This standard requires that at least 90% of the faculty have training equal to that represented by the Masters Degree. Fifty-five per cent of our faculty are not meeting this standard. This 55% must be reduced to 10% by September 1931, and to %5% of the entore faculty by September 1933. Should we fail to comply with the regulations of the American Association of Teachers Colleges by the dates named, our institution will be reduced from an A-Grade to a B-Grade school

Our first triennial report to the Southern Association was presented in November, 1928. It was accepted without question, although the regulations of this association require that all regular teachers giving instruction in colleges which are members of the association hold at least the Masters Degree. We cannot hope to have our school retain its present rating indefinitely with morethan half of the members of our teaching staff haolding ho higher than that conferred by our own institution.

There seems to be no doubt that the Ph.D. will shortly be demanded of fill the heads of the departments in institutions such as ours.

THE TEACHING STAFF

A. Regular Faculty, College and Training School.

All college and training school teachers are included in the same group, since all instructors in the training school are subject to the same standards as those employed for college teaching. Beginning in September, the Normal or High School department will become an integral part of the Training School. This will result in the teachers of the Normal Department becoming regular members of the Training School faculty and subject to the same regulations as other college and training school beachers.

Table I, given below, shows the comparative number of our teachers staff holding the various degrees in 1926 and 1929. The year 1926 has been chosen because of the fact that this was the year in which our institution became a member of the Southern Association of Colleges.

TABLE I Percentage No. Holding DEGREE 1926-1929 1926-1929 7 10 6 Ph.D 6 31 38 18 32 M. A. 58.6 55 A. B. or Less 34 46 58 84 TOTAL

The above table rescals the fact that the number of teachers holding the Fh.D remains the same, but the percentage of the total number has been reduced from 10% to 7%. The number holding the M.A. Degree has increased from 18 to 32. There has been some increase in the percentage of those holding this degree. The number holding the A.B. degree also whows a heavy increase, but the percentage of thsoe holding the Bachelors degree has been slightly decreased.

In edplanation of the marked increase in the teaching staff, the following should be mentioned:

1. A large increase in attendance as shown by the Registrar's report.

2. Reduction in size of classes, in order to meet association standards.

3, Expansion in seven additional departments to provide opportunity for specialization in same.

At the time of our admission to the Southern Association, the above named departments were either combined with other departments, or could be elected for the purpose of satisfying requirements for minors only. The department are as follows:

| Chemistry | Social Sciecnce |
|-----------|-----------------|
| French | Physics |
| Geography | Biology |

Manual Arts

In this connection, I should again call attention to the fact that under the regulations of the American Association of Teachers Colleges, it will be necessary for at least 90% of all teachers giving instruction in the college and training school to have the Masters degree by September 1931. This means that th there must be a reduction of the number of these holding the A.B. degree from 5% to 10%. The following additional facts should also be mentioned relative to the qualifications of our teaching staff:

a. Of the 32 teachers holding the M.A. degree,21 have completed additional graduate work covering a period of from six to nintty-six weeks. The average time spent in additional graduate study by these teachers is 35 weeks.

b. It is expected that two additional members of the faculty now holding the Masters degree will receive the Doctorate this summer. This will bring the number of men holding the Ph.D. degree up to eight. Three other men should complete all work for the Doctorate in the summer of 1930.

Of the 46 teachers holding the Bachelors degree, 17 have done some graduate study. The time ranges from 6 to 72 weeks, with an average of 31.weeks.

B. Special Teachers Employed for Second Semester and Summer Session

On account of the greatly increased enrollment in the second semester, spring, and summer terms, it has been necessary to employ quite a large number of temporary teachers. The number of special instructors employed for the various terms indicated are as follows:

| Second S | emester | | April | Tørm | First S | ummer | Second | Summer |
|------------------------------------|-------------|---|-------|------|-----------------------|--------------|---------------|--------|
| Ph.D. M.A A.B. or Special | 1 7 9 | 1 | M.A. | 9 | Ph.D. M.A. A.B. | 3 13 3 | Ph.D. M.A. | 1 6 |
| pheorar | 3 | | | | | | | |
| Total | 17 | | | 9 | | 19 | | 7 |

In explanation of the above figures relative to special teachers, it should be pointed out that the totals represent the entire number of extra teachers giving instruction in the institution during the terms named.

NOTE There are approximately 40 administrative officers and assistants who are devoting none of their time to instructional work, and for this reason are not included in this report.

C. Salaries (Teaching Staff)

The State Teachers ^College at Greeley, Colorado, has recently made a study of salaries in 64 State Teachers Colleges and 73 State N rmal Schools in 41 States. It has occurred to me that a comparison of the median salaries as shown by the Greeley study and the median salaries in our own institution might be of interest and value. Table II provides this information (All salaries to have been figured on a 48 weeks basis)

| Rank of Teachers | Median Salary 64 Teachers Colleges | Median Salary Western Kentucky | |
|----------------------|---------------------------------------|-----------------------------------|--|
| Professor | \$3229.00 | \$3400.00 | |
| Instructor | 2741.54 | 2100.00 | |
| All College Teachers | 2877.00 | 2600.00 | |
| Training School | 2450.00 | 1800.00 | |

The above table reveals the following significant facts: 1. The median salarywhich proffessors in our institution receive is \$171.00 higher than the median in 64 other Teachers Colleges.

2. The median salary of instructors (all others than full proffessors) is \$641.54 lower than the median salary in the 64 schools already mentioned.

3. The median salary for all college teachers in our own institution is \$377 less than the median salary in 64 other teachers colleges.

4. The median annual salary of the Training School teachers in the Western Kentucky Teachers College is \$650.00 less than the median salary in the other schools.

From the above data, it is clear that on the whole, teachers in the Western Kentucky State Teachers College are receiving salaries considerably below salaries received in other teachers colleges of the country.

COURSE OF STUDY

The general character of the course of study and the type of curricula offered for the training of teachers should be determined by the objectives of the institution concerned. Before taking up in detail matters pertaining to the course of study, it seems that a few statements should be made relative to the aims and purposes of a teachers college.

It is rather generally agreed todya that it is not the function of a teachers college to give general academic training alone, thus competing professional training for the prepartation of teachers.

The teachers college seems to occupy a peculiar position midway between the Vocational School and the Liveral Arts College, partaking of the nature of both. The Wocational School is interested largely in developing skill, while the objective of the Liberal Arts College is general training, or culture. The Teachers College must have as its aim the development of both culture and skill in the teahnique of teaching. I believe that thiw twofold puppose of the Teachers College must be kept in meind in any effective program of preparing teachers for the various school positions of our state. It seems rather clear that bothe general and professional aims must be borne in mind and harmonized, as far as possible, both as to the selection of studies and as to the distribution of time devoted to such studies.

A review of the literature dealing with the objective of teacher- training institutions show that present day discussion is shifting the canter of interest from the "whether " to the "how". Emphasis is being placed on effecting the synthesis of the academic and the professional. This sythesis is generally known as professionalized subject matter, or the professional treatment of subject matter. In practical curriculum making, the problem of adjusting and harmonizing the demands between professional and general objectives must not, in my opinion, be overlooked. I believe that it should receive more serious and thoughtful consideration than has been previously the case in our own institution.

In attempting to realize the above objectives in our own institution, it would seem necessary for us first to determine to what extent we are meeting the demands of a modern teacher-training institution and then to harmonize, as far as possible, the objectives of each curriculum, of each department and each subject with the general objectives outlined above. It seems to me that every course, that every subject offered and, as far as possible, every recitation conducted should contribute toward the realization of wahatever objectives may be agreed upon as being valid for our school.

All of us are anxious that our curriculaabe dept progressively abreast with the needs of the institution, That ithis may be done, frquent and radical changes in the course of study do not seem to me to be necessary. Improvement should come rather through a gradual but constant study of our needs and on examination of the best that is being contributed toward teacher-training programs form all available sources.

In order that we may have something besides **personal** opinion on which to make curriculum changes and bring about improvement of classroom instrucion, and in order that these changes and improvements may be based on criteria more less sound and scientific, anumber of investigations which seemed valuable for the purpose stated have been undertaken; some of these have been completed during the year 1928-29. T The general plan of the studies and investigations being used as a basis of the program already discussed is as follows:

A. Work of Curriculum Committee.

1. Syllabi oc Courses offered in the Institution.

In order that we may be able, as far as possible, to harmonize the objectives mentioned above and that overlapping and duplication of courses may be reduced to a minimum and that a general improvement in the content and method of the various courses be brought about, it seems that the preparation of brief syllabi of all courses offered in the various departments is necessary. (See Exhibit A)

2. Reaction of Students Now Enrolled.

Knowledge of the reaction of our students to certain mechanics of classroom procedure, time needed for preparation, and the value of subjects being studied would probably provide interesting and valuable information. Exhibit B, which I am here* to attaching, indicates the direction that this particular study will provably take.

3. Opinions of Graduates

It is believed that the opiniOns of those students who have graduated from our school and have had an opportunity to try out manu of the things which they have acquired at this institution would be quite helpful in our program of cuuiculum improvement. Exhibit C gives in detail the points on which we hav e collected the information.

4. Judgments of Superintendents and Principals.

I am of the opinion that our efforts in connection with the general plan outlined will be more helpfuland effective if there is avilable from time to time the judgment of superintendents, principals and others who come into immediate contact with the graduates of our institution. The questions which we have had these administrators answer may be found on Exhibit D.

5. Placement of our Graduates.

In addition to the general training, wheih certainly is necessary as a foundation for professional study, it seems that the organization of our curricla and all classroom instruction should contribut rather definitely toward peraring teachers for the positions they will likely fill in the state. If this is true, then it follws that we should have definite information as regards the demands made upon the institution for teachers and also specific sata relative to the places which our students are now occupying. The Personnel Department has provided this information.

6. Points At Which Our Students Drop Out of School to Teach.

Mr. Cannon has made a study to determine the number of students that leave school at the end of the first, second, and third years to teach before completing the work of the Bachelors degree. This information thrrows light on the organization of the curriculum by years. In other words, it helps us to determine to some extent the subjects that should be required and the methods employed in the training of our teachers for the places they are likely to take at the end of one, two or three years.

7. Practice in Other Schools.

One of the most valuable sources of information has been and will cintiue to be a study of what other Standard, A-Grade Teachers Colleges are doing as regards the organization of thir courses of study. The 65 A-Grade teacher training institutions which are member of the American Association of Teachers Colleges are being studied for the purpose of finding out their practice in building curricula for the various types of teaching service (See Exhibit E).

8. Expert Opinion. -

In this program we are making much use of the opinions of specialists in education who have done outstanding pieces of work in insestigating and administering courses of study. For this purpose, I am consulting Bobbit, Charters, Evenden, Hodmes, Jones, Russell and others.

9. Our Own Faculty.

The combined widdom, judgment and experience of the members of the Curriculum Committee, heads of departments, and the entire faculty will be taken into consideration at every step. It is to the members of our own staff that we must look for the greatest contribution toward the solution of all problems connected with curriculum and instruction.

I think it is clear from the above outline that an effort is being made to carry out this program as essentially a cooperative enterprise, including students instructors, the administration, and others.

It will take a long time and much hard work to assemble and interpret the data. It will that even more time and thought to apply the information collected to our specific problems connected with curriculum and instruction; but it seems that real imprvements in this connection can come only through continous, persistant. careful study and investigation.

B. Work of Unification Committee of the Teachers Colleges

The committee appointed by the Executive Council for the purpose of unifying the course of study of all teacher-training institutions of the state has made some definite progress in this connection, and the recommendations made by the committee have been adopted by the Executive Council. The most notable achievement of this committee was the fomulation of tree, two-year courses of study for the preparation of Early Elementary Teachers, Later Elementary teaches, and Rural teachers. These curricula will form the basis of four-year courses planned for the training of teachers for the typeslof service stated above. The curricula adopted have been incorporated in the catalog for 1929-30.

C. Curricula Offered by the Western Kentucky Teachers College.

1. Opportunities for specialization for high school teaching are offered in the following departments:

| Chemistry | Music |
|-----------------------------|----------------|
| English | Social Science |
| French | Physics |
| Geography | Agricultutr |
| History & Political Science | Biology |
| Latin | Home Econòmica |
| Mathematics | Manual Arts |

Specialization to the extent of a first minor is permitted also in Art, and Physical Education.

2. In Addition to the opportunities indicated above, the institution offers definitely outlined and prescribed curricla as listed below.

a. General curriclum, four years in length, leading to the Bachelor of Arts and Bachelor of Science degrees and the College Certificate.

Students preparing for administrative positions or teaching in high school should complete the General curriculum, with majors and minors in the field of study best suited to their needs.

b. A special four-year curriculum for the training for the peachers of Smith-Hughes Agriculture, leading to the Bachelor of Science degree and College certificate.

c. A special four-year curriculum for the preparation of Home Economics Teachers, leading to the Bachelor of Science degree and the College certificate.

d. A two-year curriculum for the training of Early Elementary teachers, leading to the Standard Certificate.

Students completing a four-year course in the fielf of Early Llementary Edueation should follow the plan of the last two years of the General curriculum after completing the two-year course.

12 4

e. A two-year curriculum for the preparation of later Elementary teachers, leading to the Standard certificate.

Students ompleting a four-year course in the fielf of Later Elementary Education should follow the plan of the last two years of the Genaral curriculum after co,pleting the two-year course.

f. A two year curriculum for the preparation of Rural School teachers, leading to the Standard Certificate.

Students completing a four-year course in the field of Later Elementary Education should follwo the plan of the last two years of the General curriculum after completing the two-year course.

g. A sixteen-hour curriculum, leading to the College Elementary certificate

This curriculum is identical the first semester's work outlingd in all curricula, with the exception of those for Agriculture and Home Economics teachers.

h. Another special curriculum prociding opprtunity for majors and minors in various technical and academic fields, and leading to the Bachelors degree, without certification privilege, has been proposed and voted by the faculty. A statement calling attention t o this new curriculum has been placed in the catalog for 1929-30

D. Correlation of the Work of the College with That of the Training School

Probably the most outstanding thing in differentiating a teacher-training institution from a liberal arts college is the work of the Training School. Yet, however, if the Training School remains an islolated unit in its activities without proper coordination and correlation with the work of the college, its effectiveness is greatly reduced and its contribution to the teacher-training program inevitbly limited.

During the year 1928-29, we have been at work on a program looking toward a closer unification of the work of the college departments and that of the Training School. Quite satidfactory progress has been made in this connection. In each of seven or eight of our departments we now hace one teacher, the major part of whose work will be concerned the matters mentioned above. It is to be hoped that other departments can work out a similar program in the near future.

RECOMMENDATIONS

1. The Teaching Staff

a. It is imperative that the teachers having training equal to or less than that represented by the Bachelord degree complete requirements for the Master of Arts degree by September, 1931. If the teachers in question do not meet this standard by the time indicated, it will be necessary to replace them by men and women holding t he Master degree. b. We should employ no one for any instructional purpose who does not already hace at least the Master of Arts degree.

c. Present heads of the major departments should be required to secure the Ph. D. at the earliest possible date. No head of a department employed hereafter should have training less than that represented the Doctor's degree.

d. One of the most notable achievements of the year has been the employment of two of three new teachers whose duties will be primarily to offer professionalizes courses in the departments with which they are connected, and to coordinate and coorelate the work of the college department with observation and directed teaching in the training school. This important phase of our teacher program should be kept constantly in ming in the employment of new teachers for other departments.

e. It would seem that the present general level of salaries in the institution must be considerably increased if we are to be able to secure and retain members of the faculty with qualifications that compare favorably with those possessed by faculty members of other high-class teacher-training institutions.

2. Course of Study

a. Our present course of study as new organized seems to be adequate for the needs of undergraduate students preparing for the various types of teaching service in Kentucky. Constant study in the light of experience, and investigation of the best that is being done by other teacher-training schools will be necessary from year to year, in order that our curricula may be able to meet the demands made upon the institution, and provide educational opprotunities second to none in the country for young men and women preparing for the various kinds of educational leadership in our Commonwealth.

b. There is a marked tendency in many states to increase the requirement for high school principals and superintendents from the AB. to the M.A. degree. There are indications that this requirement will be made of the principals and superintendents of certain school systems in Kentucky at an early date. If this should come it would mean a very great demand for graduate training in the Western Kentucky Teachers College In view of this situation, I believe that we should seriously condider the working out of a course of study on the graduate level leading to the Master of Arts degree.

This program has been discussed with heads of the departments a number of times. It seems to be the unanimous opinion that the matter of a graduate course of study should not be deferred later than the beginning of the year 1930-31.

A program of graduate study would require little additional expense, except as it demanded increased training on the part of out teachers in general, and especially for the heads of the departments. Of course, it would not at all be feasible for any department to offer graduate work unless at least the head of the department had the Fh.D. degree.

AN APPRECIATION

I think it would not be out of place for me to express a very deep appreciation for the cooperation of the members of the Curriculum Committee, Hesds of the Departments, and other teachers, in our efforts to keep our course of study abreadt with the best educational thought of the times, and adequate for the needs of the Kentucky schools. We are proceeding cautiously and carefully, bleidving that real progress in connection with curriculum and instruction must come through experience and scientific study rather than through sudden and radical changes based upon personal prejudice or opinion.

Respectfully submitted,

F.C. Grise Director of Instruction

EXHIBIT A

To the Heads of Departments:

The Curriculum Committee is constantly concerned with the improvement of our course of study. At this time the members of this committed are engaged in both an intensive and extensive study of the whole problem of curriculum building. Data are being assembled from a number of sources which should provide a sound basis for procedure inthis connection. Some of the most important of these sources of information are: Reaction of our students and graduates to certain elements in the curriculum, the judgment of superintendents and principals who employ our graduates, figures showing the point at which most of our students drop out in their four-year course to teach, practise in other teacher-training institutions, expert opinion, etc.

Although the value of the above sources in recognized, it is the opinion of the committee that the greatest imprivement as regards curriculum and instruction in coollege must come through the efforts of our own teachers. The committee is also of the opinion that this improvement can be realized more effectively by increasing the efficiency of the specific offerings in the different departments than by attempting to change the course of study through an extenseive elemination and addition of subjects or by trying to imitate curricula planned by other institution.

In order that we may be able, as far as possible to harmonize the objectives of the different departments and the objectives of the different courses with the general objectives of our school as a teacher-training institution, and that overlapping and duplications may be reduced to minimum and a general improvement in the content and method of courses be effected, the committee as a unit recommends that brief syllabi be made of all courses offered in the various departments.

It is further recommended that these outlines be prepared at the earliest possible date, in order that the committee may proceed with its investigation. ¹t is quite probable that every teacher in each department ban be made responsible for a syllabus of one or more courses and in this way distribute the burden of the work. The outlenes need not be entensive, but should be agenuine picture of what is actually bieng done in the courses rather than what may be anticipated as a an ideal.

This ought to be a valuable experience for the teachers working the syllabi. It will be a workwhild contribution to the institution. Your suggestions and criticism will be welcomed; your coperation in this very important matter will be greatly appreciated.

> F.C. Grise Chairman, Curriculum & Instruction.

N.B. Please follow gereral plan of suggested outline attached.

· EXHIBIT A CONT'D

SUGGESTED OUTLINE FOR SYLLABI

The syllabi should follow, in general, the outling given below. They should contain at least the items listed.

1. A statement by the head of the department covering the general purpose of the department as a whole. This, of course, should not be included in each syllabus.

2. Number and title of each course outlined.

3. A statement of the aims or objectives of the course for which the syllabus is prepared. This statement should, in most cases, be much more definite than the catalog description.

4. A brief but comprehensive analysis for the content of the course. This should show not only where or when the course begins and ends, but also the principle units of the material tautht so that anyone reading the outline would have a fair notion of what the course contains.

5. A short outline of the classroom procedure or methods employed in organizing an presenting the subject matter outlined and in realizing the objectives stated.

6. The name of the text and a list of all reference books and supplrmentary materials used in the course.

EXHIBIT B

November 10,1928

TO THE STUDENTS

The Western Kentucky Teachers College is constantly striving for the improvement of every phase of its activities. It desires at lal times to adapt the work of the college as closely to the needs and interest of its trudents as is consistent with sound educational principles. As an aid in this problem, we disire from time to time to determine an objective way some of the interests of our students that can be utilized in the processes of improvement. Your are, therefore, making a valuable contribution to the institution by checking carefully your preferences as regards the items listed below, and by answering all questions asked.

NAME CLASSIFICATION MAJOR SUBJECT if known

- 1. Number of class periods:
 - (1) TWo times a week
 - (2) Three times a week '
 - (3) Four times a week
 - (4) Five times a week
- 2. Use of class Period:
 - (1) Lectures; discussion incidental
 - (2) Discussion; lectures incidental
 - (3) Half lectures; half discussion
- 3. Class Discussion;
 - Usually by instructor; occasional ly by student
 - (2) Usually by student; occasionally by instructor
- 4. Conduct of class discussion:
 - (1) Students particiapte by turn (to encourage all to take part)
 - (2) Students participate without reference to turn
- 5. Readings:
 - (1) Uniform Requirement
 - (2) Wide range of choice
 - (3) Half uniform, half individual
- 6. Papers:
 - (1) Should students present papers for discussion in class?
- 7. Examinations:
 - TWo or three test throughout the semester
 - (2) Final examination only
- 8. (Reports: (1) Oral reports on readings (2) Written reports on readings.

- 11. Check the work which indicates the emphasis placed on the following items by your teacher in the class recitation:
- 12. List the subjects which your are studying at this time and indicate for which you have a desided preference, Give reasons. Indicate those you like least and briefly state why.
- 13. Give the approximate average number of minutes which you spend in preparing assignments in the different subjects which you are taking.
 - 14. Think of the best teacher that you have and list briefly those characteristics which you think make his her effective as a teacher.
 - 15. Do you atend chapel regularlyoccasionally- Never, why?
 - 9. Types of Problems:
 - (1) Committee studées.
 - (2) Individual studies
 - Individual conferences with instructor
 (1) Incidental
 - (2) By Appointment
 - (3) Required.

TO GRADUATES OF WESTERN KENTUCKY TEACHERS COLLEGE:

The curriculum Committee and Faculty of the Western Kentucky Teachers College are constatly concerned with the improvement of the curricula offered by the institution. We are striving to have our courses of study progressively meet at all times the needs of the school and the state.

We are of the opinion that our efforts in this connection will be most helpfuland effective if there is aveilable from time to time the judgment of our graduates and others as regards the various elements for the curricula offered.

Will you kindly, therefore, let us have your meaction relative to the problems listed below. There may be a certain amount of overlapping of the questions, but all of them should be answered. All any other points in which you may be especially interested.

Your immediate attention to this inquiry is earnestly solicited. Your cooperation will be very valuable, and greatly appreciated.

With kindest regards, I am

Gratefully yours,

Director of Instruction

TO SUPERINTENDENTS AND FRINCIPALS:

The Curriculum Committee and Faculty of the Western Kentucky Teacher College are constantly concerned with the improvement of the curricuala offered by the institution. We are striving to have our courses of study progressivley meet at all times the needs of the school and the state.

We are of the opinion that our efforts in hhis connection will bemore helpful and effective if there is available from time to time the judgment of Superintendents, principals, and others whocome into immediate contact with the graduates of our institution.

Will you kindly; therefor, let us have your reaction to the problems listed below. There may be a certain amount of overlapping of the questions, but all of them should be answered. Add any other points in whech you are especially interested.

Your immediate attention to this inquiry is earnestly solicted. Your cooperation will be very valuable and greatly appreciated.

With kindest personal regards, I am

Gratefully yours,

Director of Instruction

NAME

ADDRESS

- 1. On the basis of classroom performance, what subjects in our course of study do you regard as being most valuable for your grade teachers? Be as specific as possible.
- 2. What are the least valuable subjects for those who teach in the grades?
- 3. What do youregard as the most and lesat valuable subjects for your high school teaching?
- 4. In general, what do you regard as the strong points of our course of study as now organized?
- 5. What do you think should be added to make the course more valuable for teachers?
- 6. What do you believe can be left out of the course without making it less effective ?

- 7. Should there be more or fewer special method courses?
- 8. Should there be more or fewer general courses in Education?
- 9. Should the amount of Directed Teaching be increased or decreased?
- 10. Should the amount of content materal be increased or decreased?

EXHIBIT E

SUGGESTED OUTLINE FOR STUDY OF ELEMENTARY CURRICULA

- 1. Find out the number and types of curricula affered for the training of Elementary and Junior High School teachers.
- List all subjects by semester and year, giving the credit for each in semester hours.
- 3. Make a distribution of the first two years by fields in semester hours, using the following general headings:
 - (a) Academic
 - (b) Frofessional
 - (c) Activities

The total hours in each field and the par cent these hours are of the total hours required should be indicated.

Under "professional" all courses In Psychology, Theory Tests, Management, etc.

All other required courses should be placed under the heading of "activities"

- 4. Make the same distribution for the upper two years.
- 5. A distribution covering the entire four years should be made on the plan incicated aboce.

In case the curricua are not outlined by semesters and years, a general distribution should be made as indicated in 3,4 and a above.

NOTE:

Suggested form is hereto attached.

I appreciate your help in this connection.

REPORT OF THE REGISTRAR

We give below a report which was prepared by ¹. H. ^Canon, ^Registrar of the Institution, which gives much interesting information concerning attendance, certificates issued, degrees and other interesting items. Mr. Canon has also prepared some very interesting charts which are included in this report.

The items which are being presented in the following paragraphs correspond to an inventory statement of a business firm.

The success of an Educational institution may be measured in a very great part by the active interest which the publis shows. The student attendance at a college should be and is a very definite measure of such interest on the part of the public.

From the beginning of Western Kentucky State Teachers College there has been a steady growth in the number of students attending. The yearly increase in attendance over the previous year since the establishment of the Senior College program has been from four to twenty-two percent. The increase in attendance in 1928-29, 33.7 per cent of the college students enrolled in Western Kentucky State Teachers College were men. This a very high percentage of men in attendance in a Teachers College.

Another interesting fact to which attention should be called is the median age of each class. We find the median age of Freshman, Sophomores, Juniors and Seniors in Western Edntucky Colleges corresponds almost identically with the median age of these classes in the Western Colleges. This condition has not always obtained in Western Teachers College. In the beginning the average age of the student was very much higher than at present. More students are graduated from high school than at any former time and more high school graduates are going to college than in any other time in the history of our country.

Western Kentucky State Normal School was established in 1907 with the power to issur certificates, the highest certificate at that time was designated as the life of advanced certificate. In the first graduating class ten received this certificate in the year 1908. There has been a very definite increase since 1908 in the number of Standard Certificated issued by the institution. The number receiving this certificate in 1929 was 250. The increase in the number of students who remain throughout the four years for the purpose of receiving the Bachelor's degree will tend to curtail the number receiving the Standard or Life Certificate which represents Junior College graduatiion. For a number of years the completion of the work for this certificate was considered a rather adequate preparation for teaching in high schools. Standards have been raised requiring that high school principals have college graduation. Many cities in Kentucky are now requiring that the teachers in the elementary grades. be college graduates. These conditions have been factors effecting the number of Standard certificats taken from the institution sicne the establishment of the Senior College program.

In 1924 Western Teachers College graduated the first class with the Bachelor's degree. The number in the class was seventy-two. There has been a steady increase from the first year as shown by chart number 2. In the year 1928-29 the nuber graduating was 198. One-third of the number in the graduating clas of 1929 were men. In view of the fact that it is infinitely recognized that the teachig profession is made up largely of women and that this tendency is still growing, we have reason from this situation to be encouraged.

SUMMARY

| Report for | Attendance, Degrees, and Certificates | for the | year 1928-29. |
|------------|---------------------------------------|---------|---------------|
| | Total enrollment to July 22, 1929 | 3754 | |
| | College Certificates | 50 | |
| | A.B. & B.S. Degrees, 1929 | 198 | |
| | Standard Certificates | 250 | |
| | College Elementary Certificates | 375 | |

The number of certificates issued by the Department of Education to students who have earned credits here cannot be determined as yet.

REPAIRE TO BUILDING AND EQUIFMENT NECESSARY TO THE BETTERMENT OF THE SCHOOL PLANT

Ch D

Below is given a synopsis of some of the immediate needs of the institution including repairs and equipment.

Library Building

Paint widow frames(They were not completely painted with the other trim when the building was contructed.) Futty in windows. Make an allowinace for books to meet requirements of ^Southern Association of ^Colleges.

Potter College

P

Porch at rear needs repairs Metal roof over the front entrance. Straighten lightning rods Paint radiators

Administration Building

Move telephone office upstairs Parapet wall allows seepage and is damaging the plaster

J. Whit Potter Hall

Valves on radiators estimated cost \$400.00 Paint walls, woodwork and concrete floors Living room floor Putty all windows Radiator covers Shades Curtains for doors of Murphy beds. New furfiture for living room Paint radiators Install new water pipe from basement to third floor (250.00)

Old Gymnasium

Additional heating arrangements Repair roof

West Hall

Repair outside doors

Village

Stop leaks in roofs caused from blasting 'Paint trim on shingle houses'

Heating Plant

Coal bins sufficient for storage of coal. At present we only have sufficient to store one car of coal. We are also hadly in need of another bailer. Furniture and refinishing Kitchen Supplies Making Curtains Traverse Rods for sun Parlor 3 Pairs Curtains 1 Small Table 2 Footstools Cretonne Draperies for lavatory, breakfast room, Den and Guest rooms. 1 Pair Cast brass andirons 1 Cast brass fire set 1 Wicker wood holder 1 pair cast brass and wrought iron andirons 2 three-stick driftwood gas logs 2 radiant fires 62 yards cretonne drapries and stop ladder 3 small tables and 3 small stools

The following equpment was bought for the building:

| Electric Fixtures | \$605.30 | |
|--------------------|----------|--|
| Mantels | 1075.50 | |
| Wall Faper | 29.67 | |
| Hanging Wall Paper | 15.20 | |
| Gas Valve | 5.50 | |
| Frigidaire | 378.00 | |

NYW BUSINESS

The board whould at this meeting discuss the matter of putting fire insurance on the agricultural pavilion. Mr. Cuthbertson will give some information as to the situation that now exists.

GENERAL STATEMENT OF LIGISLATIVE POLICIES BY PRESIDENT H.H.CHERRY.

GENERAL DISCUSSION

ADJOURNAMENT
