This Number of Normal Heights was Written, and Compiled by Mr. Roy Seward

THE FALL SEMESTER

At the opening of the Fall Semester of the Western Kentucky State Normal and Teachers College, the Board of Trustees and its officers, the Professors, instructors, department heads, professors, etc., were very busy. The First Day of the Fall Semester was a very busy day for many people, not only in the Western Kentucky State Normal and Teachers College, but also in the world of education. The day passed without many scores of students receiving intruction, but the number constantly increases from year to year. Instead of the regular term of ten weeks, the schools and departments are divided into semesters of twenty weeks. The Mid-Semester opens on December 4, 1892, and the second semester opens on February 12, 1893.

STUDENTS’ LOAN FUND

The Western Kentucky State Normal and Teachers College is planning to launch a campaign in the near future with a view of aiding peculiarly needy students in the acquisition of an education. The present plan of eight semester of the College is the result of the endeavors to make it self-supporting. For the last half of the regular term of ten weeks, the students may enroll in the institution of higher learning for the last half of the term. The student-teacher has a double duty of cultivating their own learning and rendering service to the institution.

PERSONAL ITEMS

Miss Silvie Redifer, who has been on a leave of absence for the past year, has resumed her connection with the School of Music. Miss Redifer spent the greater part of the time in Visiting Friends.

Miss Josephine Cherry is taking a special course in Physical Education in Columbus University, New York City. Her place is being filled during her absence by Miss Blansing.

Prof. H. M. Wurlough has been given an extended leave of absence in order to continue his work in the University of Chicago. He has been visiting Miss Olive Jones, a graduate of Chicago University and the University of Minnesota. Miss Jones is doing a most creditable piece of work and has already entered into the spirit of the institution.

President Cherry and Prov. Fred. Loudermilk and Crabbe spent their vacations in Camp Woodbury, Kentucky. They report having caught an abundance of fish. They returned greatly benefited physically as a result of their outing on the river.

Prof. G. V. Pope, of the Physics Department, was granted a year’s leave at a recent meeting of the Board of Regents. Prof. Pope will spend the current year in the University of Kentucky taking graduate courses in chemistry and physics. His place is being filled by Prof. Henry Clay Anderson.

Mr. and Mrs. H. R. Matthews are settled in the Western Kentucky State Teachers College. Since graduating in the Western Normal, they have had considerable experience in this state and Tennessee.

Word from Franklin, Kentucky, indicates that Superintendent and Mrs. Matthews is achieving a marked success in his work in that city.

In a recent conversation with Mr. Scott, of Louisville, stated that the girls who had engaged from the Normal several are artists in this type of work.

CONGRATULATIONS

Bruce Harrison—Mabel Lee.
Miss Meredith—Elizabeth Williams.
Ladd—Leila Howard.
Miss Baker—Mrs. Monroe.
Orilla Morse—Allie Reid Leichtfleisch.
Odessa Govea—Mary Turner.

Prof. Island spent his vacation in Monticello, Tennessee. While there he gave a piano recital. He also visited his home in Memphis, where he is the organist of the United Methodist church, which is one of the largest churches in the city.

Mr. Ivan Wilson, head of the Department of Drawing, who spent the summer in Chicago University taking a special course in Art, reports a very pleasant stay. While there he saw many of his former students, and was given credit for his work. His place is being filled during his absence by Miss Lena Dunaway.

Miss Margie Holm has resumed her work in the Library. Miss Holm has just returned from Pratt’s Institute, where she took a course and graduated in Library Economy.

Prof. E. C. Grice, the Head of the Department of Latin, is attending Peabody College during the current year on a scholarship which was awarded him by that institution. This is his third year in the profession which he devotes most of his time to.

Prof. Grice will return to the Normal after he finishes his course at Peabody. He is working on his Doctor’s degree. His place during his absence is being filled by Mr. Gordon Wilson.

Although Dr. Gamble has been connected with the Western Kentucky State Normal and Teachers Colleges only a short time, he has already made himself felt as a powerful force in the institution’s life. His title is Professor of Economics and Administration. The Institution is certain to benefit in having his leadership. His presence will add to the character and caliber of Dr. Gamble. The Institution is wishing well to Dr. Miss Gamble and Miss Emma Jean Gamble, who have just graduated from the Western Kentucky State Normal and Teachers College.

Another agency that has justified its raison d’être is the Normal Heights Bookshop. It is the essence of a vital tool, and is intended as a cooperative effort on the part of the school to provide books to students-teachers at as reasonable a rate as is in accord with business economy. It makes the purchase of books a convenience and easy matter for the student and, at the same time, has a tendency to bundle the book propositions as perhaps nothing else could. The bookshop endeavors to take over all second-hand books that are in current use from students when they are through with them, thus enabling it to sell them again at economical rates. The method is productive of a great saving of money to the student-body in the course of a year’s time. Mr. H. C. Sprickard is in charge of this department and is rendering a splendid service in this capacity.

GENERAL INFORMATION

The enrollment of the Western Normal during the last scholastic year was 2,581 different students-teachers. This is an increase of 780 over that of any previous year in the institution’s history.

The Correspondence Department is doing a great piece of work. Only two years have elapsed since the establishment of the Correspondence, yet during this interval many students have availed themselves of the opportunities which it offers. More than one thousand students are now taking work in this way. The Correspondence is self-supporting and has become an integral part of the activities of the Institution.

The Western Normal is functioning in the lives of a large mass of people is self-sufficiency. The aggregate number of students receiving direct instruction through the instrumentality of the Western Normal and Teachers Colleges is 3,985. This number includes those enrolled in the Normal, the Training School, and the Correspondence Department.

The Correspondence Department, in many respects, is one of the most important agencies connected with the institution. Not a day passes without many acres of customers crossing its threshold with a view of purchasing the necessities of life. The Correspondence endeavors to buy at wholesale prices and, by making a small margin of profit, to make it self-supporting. It is an indispensible item in the life of those students who are doing light housekeeping, as well as in others. The Correspondence is under the able and efficient direction of Mr. J. Ivan Wilson.

The Departments of English, History, Government and Problems of Democracy, American History (formerly History 1 and 2), English History, Government and History, and English Literature (formerly English 6 and 7), were opened for the current year in different students, not counting the School and the University. This year, 1,200 were high school graduates. Judging from attendance, the attendance this year will greatly surpass that of last year. We have more high school graduates enrolled this semester than ever before, and the number constantly increases from year to year. Instead of the regular term of ten weeks, the schools and departments are divided into semesters of twenty weeks. The Mid-Semester opens on December 4, 1892, and the second semester opens on February 12, 1893.

STUDENTS’ LOAN FUND

The Western Kentucky State Normal and Teachers College is planning to launch a campaign in the near future with a view of aiding peculiarly needy students in the acquisition of an education. The present plan of eight semester of the College is the result of the endeavors to make it self-supporting. For the last half of the regular term of ten weeks, the students may enroll in the institution of higher learning for the last half of the term. The student-teacher has a double duty of cultivating their own learning and rendering service to the institution.
SPORTS ACTIVITIES

Early last spring President Cherry secured the services of Coach Mabie to train the football and track team of Centre College, to train the Normal football squadron. This selection showed good judgement, for the Normal team has not won a single game for the last two years. They were put through a regime of grueling training, the discipline which made them as hard as nails. Coach Diddle has made his team self-sufficient, and it now plays gracefully, quickness of thought, and physical courage. With these characteristics, one could hardly expect them to lose to the Western Normal, which has lost none of the games played and it hopes to place the remainder of the games safely on the Normal side of the ledger. The local lunch game will feature the strong Louisville team, defeating the varsity by a score of 13-0. This game was played on the Louisville gridiron.

The second football game was played on the 6th, the opponent being the Marshall Brown Normal of Sterling. The score was 31 to 0 for the local squad in the third game the Normal knocked horns with the Cumberland University at Lebanon, Tennessee, according to the pigskin sheet, the score being 6 to 0. The Tennessee Polytechnic team played here on Friday, October 26th, and the score was 45 to 0 in favor of the home team. The boys were on the billboard here on the 28th. The score was 18 to 0 in favor of the guests. Louisville played here on the 31st, to find out how good a team they had, and as it turned out, the Normal aggregation is today the most important game of the season.

The Western Kentucky State Normal and Teachers College has made her debut in intercollegiate athletics with high expectations. She has nowhere an opportunity to meet with an organized team as might be expected. She is in the fresh field of activity. The outlook is promising. The morale of the athletes is excellent, and the school and the town are a unit in believing the Normal will not lose a single game during the remainder of the football season. The players have the utmost confidence in their ability, and the faculty and students have more than a fighting star to the athletic armament of Western Kentucky football.

The "scrums" of the Western Normal football team defeated the Howard team on the hard lines on October 26th. The score was 15 to 0.

The Bethel College aggregation from McKeen, Tennessee, proved to be an easy victim for the Normal, the former being defeated, 49 to 0.

The Eastern Normal football squad of Richmond, Kentucky, was the first team of the year to succeed in scoring against the Western Normal. The Eastern Normal were on the offensive from start to finish. Only an error in making a forward pass placed the ball in the opponent's territory, but they have no margin and an enduring star to the athletic armament of Eastern Normal football.

The Normal lost its first game of the season when it went up against the Vanderbilt Reserve on November 26th. The game was played in the Vanderbilt Stadium, Nashville, a dreary rain fell during the match, making the ground slippery and a disadvantage of hard conditions for the Normal athletes. They succumbed to their strengths and fall in front of the Normal by 15 to 0. The Normal lost this match by 15 to 0. The score in favor of Vanderbilt was 1 to 0. One error in making a forward pass placed the ball in the opponent's territory, but they have no margin and an enduring star to the athletic armament of Eastern Normal football. The Normal boys lost and had been able to put their strength in the match, but they have been defeated by the Vanderbilt.

The biggest gridiron event of a team is the spirit that refuses to admit defeat even when the odds are stacked against it. The boys have not lost their pep nor has the ability been disappointed. They have to work hard with a grim determination to rectify whatever shortcomings they may possess.

The Western Normal rounded home to an easy victory over Kentucky State Normal last November 24th on the Western Normal gridiron, the score being 19 to 0.

The football season closes on Thanksgiving Day when the Southern Presbyterian University plays here. The Western Normal needs certain of victory in the remaining lists.

VACATION TRIPS

Mr. and Mrs. Leliger did the usual thing for a school teacher—took two relatives on a greater portion of the summer in southern Minnesota fishing on the lake, and as is usually the case with married men, his wife took the ladies. She caught two ten-pound fish while her husband was eight pounds.

And Mrs. Kinneman report a long "happy" trip. They were out thirty-five years to the first of a ten-weeks' trip. They left Kentucky, crossed Ohio twice, were in Maryland, crossed Pennsylvania, visited the State of New York, and did their best to see the Northern states, and report having had the time of their lives, and a "grand- daughter."

The GIRLS' PEP CLUB

The "Girls' Pep Club" is one of the outstanding features in the institution from the standpoint of creating an athletic spirit. The members of the club are particularly behind the football activities of the season. To illustrate: "Stiffness in a manner" was observed by them about a month ago. Suddenly, as if by magic, a young lady jumped the stage to the stirrups department. A bevy of girls arose at the wave of their magic wands. These women were the female elements of our student body. Unquestioned, pep and enthusiasm characterized their yells. They all seemed to be of one mind. The yells were probably heard a good distance away. There is no doubt that the student body is the most enthusiastic group throughout as long as there shall be a chapel exercise at the Western Normal and Teachers College. It is a wonder that Chapel is not the scene of more conspicuous activities. "Girls' Pep Club" are physically insusceptible to them, yet they are able to mentally hear the yells of the "invisible host" and to visualize former demonstrations at chapel in their behalf.

A TRIBUTE

During the spring movement was launched for the purpose of securing funds with which to purchase some lots of a tribe in recognition of the splendid Cherry, whose efforts indicate and indefatigable labors have elevated the Western Normal to the rank of a college. A fund of $350 was already on hand from the joint efforts of the Western Normal and Teachers Colleges. A committee was appointed and it was decided finally to purchase a bronze statue of Cherry to be placed in the front hallway just between the two doors at the entrance of the faculty and student residence. The statue is 25 by 49 inches and the inscription thereon is as follows:

OUT OF GRATEFUL HEARTS

STUDENTS OF THE WESTERN NORMAL SCHOOL, 1825 HAVE ESTABLISHED THIS TABLE AS A TRIBUTE TO COMMIONER THE UNENDING LABORS OF HENRY HARDON CHERRY IN TACKLING THE DIPLOMA OF THE COLLEGE.

THE CULINARY DEPARTMENT

NEW STAGE CURTAIN

Bolted, a marvelous transformation! A beautiful velour curtain now adorns the auditorium states of the Western Normal and Teachers College, the eyes of the battle-scarred makeshift that herebefore has greeted the student-body and visitors from morning to morning. The outward recognition of the institution's bountiful endowment is a curtain of the mind. It symbolizes the generosity of the faculty and students, their compassion and individual and collective. The faculty and students raised a fund with which to make the initial payment, and the curtain was secured. The curtain was presented by the McCormick and Company at a cost of $1,090.00.

Mr. Brown is certainly a master of the culinary art. He has not failed to make the smallest dish complete. He has never failed to measure up to the requirements of the occasion. On short notice he has been known to prepare a splendid dinner for any number of people. He is an expert in his line of work and knows the art of preparing a picnic lunch as only few people understand it. The institution has already indicated its appreciation of the work of the men for their unerring efforts in this department. The dining room is in full capacity this semester, the majority of the students taking their meals there.

NEW MOVING PICTURE SHOW

The institution is now in possession of a magnificent moving picture screen. The school has long been in need of a screen of this nature. This screen is one of the best school screens of its kind in the state, nearly ten feet selected by J. H. C. Mabie, whose ambition is to be the first student in the institution to show illustrated educational films at chapel exercises and at other times throughout the year. The motion picture screen and the new stage curtain are a decided improvement in the general appearance of things on the stage and furnish a becoming background and setting of which anyinstitution might be justly proud.

THE TEACHERS COLLEGE CLASS

The work at the Teachers College has started off with a magnificently showing. Four-eight pupil aggregations in all are enrolled in this feature of the work. New members are constantly coming to the school. This is an indication that the first graduating class will be a large one and a credit to the institution. It is unusual for a teachers college just getting started to have such a large number as is enrolled in its initial graduation exercises, but we are planning to have at least seventy-five pupils in 1924. There was never a time when an education was more essential than at present. The change, conditions and distress that now exist in the social, political, and industrial world demand and call for educational leaders of brain and strength of moral character who can deal with those problems in an intelligent and efficient manner. The teachers college is the place where these men are to be trained, the institution giving them the necessary professional and academic preparation and an opportunity to adjust themselves to the modern world of to-day and help solve the momentous problems now pressing upon us for solution.

FARM AND POULTRY

On October 15th, ninety men from the Agricultural Department accompanied Mr. Culiver, Mr. Marsh and Bunch, packed their lunch baskets, and left on a special car for Hopkinsville to attend a poultry field clinic on the farm of Mr. A. C. Smith, who have established on his beautiful 340-acre farm, Mr. Culiver has twenty-four hundred Leghorns and last year made a labor income of $4,61 per hen. He grows 500 chickens and 100 turkeys from this farm. If her environment is right he is given the proper conditions and proper care, his success is amazing in all the reports of Mr. Culiver, Mr. Wilson, president of the Kentucky Poultry Association; also speak up by Dean Cooper of the Agricultural Department of Kentucky and Mr. Smith, of the Extension Department.

The poultry plant at the Western Normal has had a good year. It has had its eggs down—up to 1,500 eggs in one week from 275 hens on last day in May down to only thirty eggs in November. But the 1,500 new hens that are coming in February and March will make the whole thing fresh again.

The Agricultural Department is doing its part. It is yielding a production of 1,800 bushels of sweet potatoes per acre.

The Dairy is producing a nice quantity of milk for the boarding home and it is making about 1,000 pounds of butter weekly.

At the Warren County Fair, the Normal Dairy herd took nine first prizes and three second prizes out of eleven entries.

Mr. Ford, with his assistants, Loudermilk, Wiltzour, Brudor, Liddle and Rotto, are doing some real agricultural work at the present time. They have already taken awards in seven different classes. Mr. J. B. Hark Davis, who is the University of Wisconsin at this time, will return in February to take up his work in connection with the Agricultural Department.

CLASS IN ANIMAL HUSBANDRY STUDYING BEEF HOGS AT FIRST HAND.
The Physics Department has recognized the importance of fungi and their effects on plant life and has invited a group of experts to conduct extensive experiments throughout the summer. Mr. Anderson, the head of the department, and his assistants, will be working with a group of fungi that are expected to be identified in the laboratory.

The graduating class of 1923 will be featured in the annual commencement exercises. The exercises will take place on the 25th of June, and the keynote speaker will be President Wilson. The exercises will conclude with a special address by the retiring secretary, Miss Swanson Vel'.'sop, of the Western Normal and Teachers College.

The Extension Department is offering a new series of courses for the upcoming semester. The courses will be taught by Correspondence and include subjects such as History, English, and Mathematics. The courses are designed to be flexible, with students having the option to complete them at their own pace.

The summer course offerings include a series of courses in Agriculture, which are open to all students. The courses will cover topics such as soil science, crop management, and pest control. The courses are taught by experienced instructors and are designed to provide students with practical skills they can use in their future careers.

The Spring semester is set to begin on the 5th of March, with classes meeting three times a week. The Spring semester will conclude on the 15th of June, with the final exams scheduled for the 20th of June. Students are encouraged to register early to secure their spots in the courses they wish to take.

The Summer session will begin on the 1st of July and will run through the end of August. The Summer session will offer a variety of courses, including those in Education, Business Administration, and Liberal Arts. The Summer session is designed to accommodate students who are unable to attend the regular academic year.

The Fall semester will begin on the 1st of September, with classes meeting three times a week. The Fall semester will conclude on the 15th of December, with the final exams scheduled for the 20th of December. Students are encouraged to register early to secure their spots in the courses they wish to take.

The Winter session will begin on the 1st of January, with classes meeting three times a week. The Winter session will run through the end of March, with the final exams scheduled for the 20th of March. The Winter session is designed to accommodate students who are unable to attend the regular academic year.

The Spring semester will begin on the 1st of April, with classes meeting three times a week. The Spring semester will run through the end of June, with the final exams scheduled for the 20th of June. The Spring semester is designed to accommodate students who are unable to attend the regular academic year.

The Summer session will begin on the 1st of July, with classes meeting three times a week. The Summer session will run through the end of August, with the final exams scheduled for the 20th of August. The Summer session is designed to accommodate students who are unable to attend the regular academic year.

The Fall semester will begin on the 1st of September, with classes meeting three times a week. The Fall semester will run through the end of December, with the final exams scheduled for the 20th of December. The Fall semester is designed to accommodate students who are unable to attend the regular academic year.

The Winter session will begin on the 1st of January, with classes meeting three times a week. The Winter session will run through the end of March, with the final exams scheduled for the 20th of March. The Winter session is designed to accommodate students who are unable to attend the regular academic year.

The Spring semester will begin on the 1st of April, with classes meeting three times a week. The Spring semester will run through the end of June, with the final exams scheduled for the 20th of June. The Spring semester is designed to accommodate students who are unable to attend the regular academic year.
ADMINISTRATION BUILDING ON NORMAL HEIGHTS

K. E. A.

The K. E. A. this year promises to be one of more than usual interest. Prof. Craig, the president of the Association, is actively at work with a view of doubling the present membership, the enrollment at this time being five thousand. If this goal is reached, many indication points to its accomplishment, it will make possible the employment of an all-time secretary. The meeting of the K. E. A. this year will be held on April 19th at the Beta, Indianapolis. Let's all keep in mind that Mr. Craig in realizing his laudable ambition and to help make this patriotic organization what it should be—a tremendous force in shaping the educational policies of the state. The following committees on membership have been appointed: J. E. Coleman, Pendleton, McCracken county; John L. Graham, Greenup, Daviess county; Annie Willey, Evansville, Logan county; W. E. Potter, Boston, Marshall county; W. B. Roberts, Clinton, Harrison county; D. M. Allen, Manchester, Clay county; E. R. West, West Liberty, Morgan county; L. H. Neece, Somerset, Pulaski county; Mary B. Mass, Georgetown, Scott county.

FRESHMAN SOCIETY

The year 1923-24 opened with a group of 150 "Freshmen" determined to execute their own individual command—"Forward, March." They realize the importance of their formation and, where ever there was a more enthusiastic and energetic class, they were looking forward to their work in the society as well as athletics and special programs, which will be given from time to time and from them grow, because they are the Sophomores of next year and the college students of the future. Come, all ye Freshmen, and join our happy band.

MR. POTTER'S SUCCESSOR.

Mr. Sterrett Collinhorn has been appointed local regent of the Western Normal to succeed Dr. J. W. Potter. Mr. Potter, the outgoing regent, has been connected with the institution as regent for the past fifteen years—ever since its organization, and in this capacity he has exercised a potent and far-reaching influence for good that is incalculable. His unselfish service in this field of humanitarian endeavor cannot go uncompensated, for good deeds are immortal and bring their own reward. Mr. Potter has left his impress upon the institution, J. W. Potter Hall, which is named in his honor being a fitting tribute to his unting labor in behalf of Kentucky childhood.

His successor, Mr. Collinhorn, the incoming regent, is a public spirited citizen, interested in every beneficent enterprise—a man of high ideals and progressive educational insight. He brings to the institution the rich experience of a successful business career, and the institution is fortunate in having such a man of his type to serve in capacity of regent.

A NEW DEAN

Dr. G. C. Gamble has just recently been appointed Dean of the Western Normal and Teachers College to succeed Dr. Kinnaman, who has resigned. The institution suffers a distinct loss in the withdrawal of Dr. Kinnaman as Dean. He has served the institution faithfully and conscientiously for the past sixteen years—ever since its organization, and in this capacity he has thrown himself whole-heartedly and unreservedly, bringing to bear upon his work every inch of his energy and life. Dr. Kinnaman withdraws as a result of his own choice and as a result of his own desire to be relieved of the routine matters connected with the institution. Dr. Kinnaman has never been accused of being a shirker. On the other hand, he has done a great deal more than he was required to do—more than any man ought to have done. Dr. Kinnaman will not leave the institution, but will remain in it in the capacity of teacher and leader in the educational activities.

His successor, Dr. Gamble, is a highly trained educational administrator—a man of sterling qualities and lofty ideals; and the institution is to be congratulated upon securing the services of a man of his type and calibre. Dr. Gamble did not select the office of Dean or make application therefor. He was induced to accept it only after importunate urging, and even then with great reluctance.

SOPHOMORE SOCIETY

The Sophomores began the Fall Semester with an enrollment of 500, which is made a contrast with the Fall Enrollment three years ago of only forty-five. The society has been divided into eight groups according to geographical divisions of the Western District. Each group is responsible for a program in its turn and looks after its own arrangements. Sections one and two have already given very excellent programs, which are to be succeeded in regular order by the other sections. It is removed that there is to be a great debate in which the all sections are to challenge the events. The Sophomore Revue is to be held this year at the end of the first semester, and a committee has already been appointed to work out details. Since this is the first year of the Teachers College, the Sophomores intend to see that it is properly advertised. The Sophomore Annual Variety Night this year will be held on Holloween as was the original design of this institution. Maidenblushes and winoos have already advanced considerably in price because of the unusual demand this year. The girls have been making excellent profits in basketball, and it looks as though the Sophomore girls' team would be the best in several years. The Thading School Chapel is already full at every meeting. If you are to be a Sophomore when you return, do not be alarmed, because we will find some place on Normal Heights for the awaker and enthustema of the Sophomores. Do not get too interested in other work after your school is over to take the first train. The Sophomores will see that you are not taken care of.

JUNIOR SOCIETY

The Junior Class inaugurated the season of 1923-24 with an attendance of 318. This class is composed principally of the brand new products of our various high schools. They are vigorous, indefatigable and optimistic, and had not been here twenty-four hours before they had the spirit of the institution. They expect in be leaders in the various activities of the school—athletic, forensics and academic. The usual programs will be given and the talent this year indicated some superior performances.

SENIOR SOCIETY

The Senior class this year has a membership of 300 people. All are enthusiastic and are working toward graduation in the Life Certificate Course. Mr. T. O. Hall was elected president of the Society and Miss Virginia Wobmae was made secretary. The Seniors are planning to make some money with which to complete the interior of the Senior building. They will put over at graduating time either a Cup or a Queen, and hope to make it a program that the institution will be proud of. The Society this year will be under the direction of Price, Craig and Anderson.

ATTEND YOUR HIGH SCHOOL

The Western Normal urges every high school undergraduate to attend his own high school and to get the required fifteen units of high school credit behind him as soon as possible. The Western Normal, while accepting undergraduates under certain conditions, wishes to take this opportunity to appeal to students under eighteen years of age will find it very material to their adventure to finish their high school courses before entering the institution.

EXPENSES

J. WHIT POTTER HALL

4 in a room ........................................... $10.00 per semester
3 in a room ........................................... $12.00 per semester
2 in a room ........................................... $15.00 per semester
Meals ................................................... 10.00 per semester

BAILEY HALL

3 in a room ........................................... $19.00 per month
4 in a room ........................................... 14.00 per month
Meals ................................................... 10.00 per month

FRISBIE HALL

Light housekeeping rooms ........ $12.00 per mo. per student
Where two occupy a room ................ $24.00 per mo. per student
Rooms other than for housekeeping ........ $5.00, $5.50 and $5.75

Rooms in the city range in price from $4.00 to $12.00 per month per student, two people occupying a room. Meals in private families may be obtained for $4.05, $5.00 and $6.00 per week.

FREE TUITION

There is plenty of free tuition in your county for all eligible applicants. If you are planning to attend the Western State Teachers' College and Normal School, I would suggest that you make application to your County Superintendent for a free scholarship.

Persons desiring additional information should write to
