Dear Biology Alumnus,

Another year has rapidly passed and I wish to update your knowledge of the Department of Biology at Western Kentucky University and share with you information about your fellow alumni. I hope that the past year has been a productive and healthful one for you and yours.

As promised last year, the newsletter has been changed to include more information about alumni. If you returned the questionnaire last year, the information provided appears in this issue. Please use the questionnaire this year to update the information for us so that your biology classmates may know of your present location, position and activities.

In general, 1987-88 was a year of turmoil for the Department of Biology. Asbestos removal and renovation in our building severely restricted its use. We are presently returning to our offices and laboratories. Although we had a disrupted existence, the faculty and students were quite successful and several individuals had an outstanding year.

We extend our deep appreciation to all of you who contributed to our department either through regular scholarships or contributions to the Biology Developmental Fund through the College Heights Foundation. As the cost of equipment and supplies continue to increase, your generous gifts will be appreciated and used to improve our facilities and programs.

I trust that you will enjoy our attempt to improve the newsletter. Your cooperation in making us aware of your activities will certainly add to future issues.

Sincerely,

Valgene L. Dunham, Head

Scholarships

A total of 126 students majoring in programs administered through the Department of Biology were awarded 139 scholarships with a total dollar value of $118,115. This amount was approximately 12% of all scholarship money awarded by the University in 1987-88. Thirty of the above mentioned scholarships are funded by endowments that have been generated largely through the efforts of the biology department faculty, staff and you, our alumni. Many of you have donated to the Biology Scholarship Fund which now has a total endowment of over $31,238. Other contributions have been made to the E.O. Beal Scholarship Fund, the Lewis B. Lockwood Fund, the J.R. Whitmer Fund and the Florence and Basil C. Cole Scholarship Fund. If you wish to contribute specifically to any of the above funds or if you wish to contribute money to the unrestricted Biology Developmental Fund, simply indicate on your check the fund designation and mail to us. All contributions are vitally important to the department's continued progress and the well being of students continuing the excellent record that has been established by WKU biology alumni.
