

Newport July 30th 1838.

Gentlemen

Seeing an advertisement in relation to a school in Madison, I take the liberty to address a line by way of inquiry - If no teacher has as yet been employed, please answer the following questions, - What is the nature of said charter & what is implied in being governed by it? What would be the probable amount of salary by the year? or what number of scholars & at what prices? I have been engaged in teaching a number of years - Four years I was preceptor in the Academic department of Augusta College in which young men were prepared for College &c - Satisfactory references will be given if necessary - My wife has had some experience, in teaching, of a female department - Should be found requisite.

Yours &c -

Geo Root
