BE IT RESOLVED that it is the wish of the other members of the Board of Regents that the Governor of Kentucky reappoint each of them as members of this Board, believing that their experience in the management of the Western Kentucky State Normal School and Teachers College makes them especially fitted for the discharge of the duties vested in them by the law of the State, and that they respectfully request the Governor to reappoint them.

The matter of a water tank being erected by the city of Bowling Green for fire protection and sufficient water supply, at little or no cost to the institution, on Normal Heights, was discussed. President Cherry and Regent Potter were instructed to see the proper authorities.

The Board then adjourned.

June 22, 1922.

The Board met in the office of President Cherry, there being present State Superintendent George Colvin, and Regents Haswell and Potter, with President Cherry.

The course of study which was prepared by the Normal Executive Council for the Teachers College was presented to the Board by the President of the institution and was ratified and ordered by the Board to be put into operation, beginning with the opening of the Fall Session, September 25, 1922. This course of study was prepared and submitted to the Board in obedience to a resolution passed at the joint meeting of the Boards of Eastern and Western State Normal Schools held at the Watterson Hotel in Louisville on April 13, 1922.

The Board also Authorized President H. H. Cherry to continue his efforts to organize the working forces of the institution for the scholastic year beginning July, 1922, and to employ such teachers as are necessary to make the work of the old courses of study and the extended courses of study effective.

Regent Potter and Treasurer Hines were authorized to make such contracts for coal for the ensuing year for the institution as should be to the interest of the school.
President H. H. Cherry made a general statement of the finances of the institution to the Board, showing that with proper economy the institution would be able to pay off all its indebtedness prior to the opening of the General Assembly, provided the sale of Frisbie Hall and Bailey Hall is consummated and the collections made for it.

The Board then adjourned.
