The Future of Western State Teachers College

The Western Kentucky State Teachers College belongs to the people of the Commonwealth. It is a State institution, conducted by the State, for the State. It is an institution of higher learning that is accountable to the people of the Commonwealth, and by offering courses of study founded upon the educational needs of the people it serves. It is the duty of every person to take part in the work of the College, and every one should contribute to its support.

Through its history, the Western Kentucky State Teachers College has been in the forefront of the need for advancing the educational needs of our public school system, and in the development of the educational needs of the State, and the whole hearted cooperation of the people of Bowling Green and Warren County and the citizens of our Commonwealth the future of our College shall be assured.

The school did not decide to enter the field of graduate work until the demands became most earnest and necessary. The institution felt that it was a fundamental responsibility to create a program of advanced studies to meet the legitimate demands of the students. For several years prior to the establishment of the Graduate School it had been apparent to the members of the administrative and instructional staffs of the institution that at some time in the near future it would be necessary for the college to inaugurate a program of graduate study in order to meet fully its educational responsibilities.

Bowling Green Has Leading Transfer Company of South

Bowling Green, Kentucky, has the headquarteer and Home office of the largest Transfer Company in the Southern States. Mr. A. M. Whitney, chief business under the firm name of Whitney Transfer Company, started this business with one truck, located at the corner of Main and Adams Streets, March 15, 1892.

Mr. Whitney came from Scottsville in 1916, a teacher in the County schools, and with the Bowling Green business established November, 1896. After completing a business course in this institution, he left Bowling Green in 1917 for Bluefield, West Va., where he was employed for three years by the firm of the Turkey Gap Coal & Coke Company for two years. Then he returned to Bowling Green and established a transfer agency in the south. The business was disposed of this interest and went to Dallas, Texas, to establish the shoe department of the Yellow Cab Company.

The writer was connected with all manner of transfer business, having his office with them, and frequently doing an average of fifty to seventy-five truck purchases by Mr. Whitney, and each purchase was made on the day due. From the beginning, the business was conducted on a business-like method and by the assistance of a number of clerks, the typist and executive ability. He has added to the fleet until now he is operating sixty-five trucks and fifteen freight cars. He also has the largest and best equipped trucking company in Kentucky.

The Whitney Transfer Company has lines extending to the principal cities in the state, and to the principal towns in the local district, the principal cities being Memphis, Atlanta, Nashville, Louisville, Bluefield, Charleston, and all points in between.

The company has established agencies in L. L. & N. Railroad towns, and recently he has added to the fleet until now he is operating sixty-five trucks and fifteen freight cars. He also has the largest and best equipped trucking company in Kentucky.

"You eat Ice Cream before your first tooth comes in, and after you've lost your last one . . . .

Pure cream—pure sugar—pure fruit or flavoring—it's what we call Ice Cream, no other way to call it. We make our Ice Cream and have for years. We do it the old-fashioned way, the way our parents did it. We think it tastes better, and besides we're the only place in town that makes it in small galleons, just the right size for a small girl or boy. We have a special order for Ice Cream, and you can have it delivered each day.

We have a special order for Ice Cream, and you can have it delivered each day.

The greatest joy is in being a part of this great American and all woolen suit business, and should not be dis­closed to anyone. The new employee, in signing the receipt, added, "I won't mention it to anybody. I'm just as much advanced of it as you are."—London Times.

A woman went into a drug store and said, "Tell me, Mr. Snell, where is the "Solvite"?"" The clerk replied, "Just the size, lady."

Athletics at Western Teachers College

(By Ernie Miller)

Athletics at Western this year have moved along splendidly. Without undue emphasis, the administration, the athletic services and the department of athletics, have endeavored to place all forms of athletic sports within the reach of all and on such a plane as will insure the best returns in the way of sunshine physical development and splendid training for citizenship. All of the major games were won by the Kentucky Military Institute, and Bob Miller leads the Men's Football team.

The season's record, in the opinion of the learned by the team and that an excellent one, will be lost from the Freshmen team, rallying and 'Depression' season's record, in the opinion of the learned by the team and that an excellent one, will be lost from the Freshmen team, rallying and "Depression"

Football

The Freshman football team, under R. E. Dobbins, Director of Athletics, and Bob Francis, has proved to be one of the strongest teams in the country. The team has faced and defeated the Louisville University, Kentucky Military Institute, and some of the outstanding programs for Varsity material at Lee University, Vassar, Ferovery and Hall back; and Bendick, Swisch, Floyer, Fieux, and Cowan, all. The Freshman team will play the Freshman team of Tulane Polytechnic Institute at Charlotte, Tecumseh, Thursday, Friday, November 18th.

BUSINESS IS IMPROVING

(Will Tom Arnold)

Business is improving; Prices for the commodities are going to come stronger. They should be a price, they will be a price, when they become stronger, to that degree will business become better. Shall we fight to keep prices down and with them wages and salaries, or shall we welcome increased prices of commodities and with them a return of normal wages and salaries and extraneous normal business?

Two agree we can encourage or retard this movement—the Buyer and the Siler. Price cutting on the part of the seller will do a good job of retarding. Those who participate in it are enemies to each other and they who become stronger, to that degree will business become better.

They will have to pay for it, and for that reason the voice of the people is with us. The consumer is a strong and mighty body with no equals. They are a mighty force and they are buying only fifty per cent of normal requirements. They are strengthening commodity prices and normal buying conditions can realize a living wage; and third, that there must be a policy of price cutting for the restoration of efficiency.

Employees are essential for good citizenship, social security and its building of good fellowship will bring it as a one of the highlights of the 1932 homecoming.

EVENTUALLY

You Will Make Those Repairs,
WHY NOT NOW?

We have recently bought the stock of another local Lumber yard, and have many items to offer at less than cost. Do your repairing and remodeling now while materials and labor are cheap. Estimates on request. No obligation.

BOWLING GREEN BOOSTER

Depression

Supper

One of the many outstanding events of the homecoming celebration which was observed on College Heights on November 5th was the Benedictine University's annual fall-festival rally and 'Depression Supper' served in the Physical Education Building following the Hippodrome football victory over the Georgetown Tigers. The supper which attracted between 2000 and 2500 guests and which was planned to re-establishing success in every way. The Depression Supper was truly in the economy of food values. Its total cost was less than eight cents a plate, yet its menu presented a beautiful repast for very hungry home-comers who saw the Teacher team lose the Franklin College in their return home. The college deserves much praise for the way in which the Western homecoming was handled. Every number of the day's program was a boost for Bowling Green and Warren County as well as the college. The Depression supper, however, because of its novelty, its economy, its dietary and its building of good fellowship will always be remembered as one of the highlights of the 1932 homecoming.

BOWLING GREEN a Trade and Social Center for Agriculture

(by Dr. M. C. Ford)

Of the many factors that may enter into the building of a city, at least three factors are of major importance. These three factors are the geographic location of the city, the volume of trade and service area, and the desire of the city to grow as reflected through and upon the people in the trade and commercial organizations.

Bowling Green is the geographic location of the center of the St. Louis time zone corridor which extends from West Point on the north, through the Ohio river counties, into Tennessee, and to Princeton, Kentucky, on the west. This corridor embraces some three thousand square miles, with forty miles in width and fifty in length. This area is well adapted for agricultural uses. The Waverly area in the east and south and the coal field areas on the north are well adapted for agricultural uses. A glance at the map reveals Elizabethville, Munfordville, Horse Cave, Cave City, Glasgow, Bowling Green, Russellville, Frankfort, Hopkinsville, and Princeton, Kentucky, and Galatia, Tennessee, as being located in this time zone corridor with Bowling Green being located near its center. This list of towns includes all trade areas of any considerability in central-western Kentucky, except Greenville and Central City which owe their development largely to the coal mining industry, and the Ohio river towns which again owe their development largely to the acres and potential agricultural areas bordering the Ohio river. It is this industrial and its Memphis branch. highways that radiate in all directions and make its services readily accessible to all of central-western Kentucky. This much emphasis cannot therefore be placed upon the railroads of Bowling Green because of its geographic location. This city has a capacity for greater growth and development.

As a trade and social center Bowling Green has a capacity for increasing the tastes of those who reside in the region largely to the coal mining perity of the region. These three factors trade and service increasing. By the Highway 31-W Association for in-Warren and Simpson counties, well

WILL BROWN MARTIN

Correspondent

E, the undersigned fire, life and casualty insurance agencies of Bowling Green stand 100% for Western Kentucky State Teachers College in all its activities, and believe it is the greatest State College in Kentucky and that to Bowling Green and Warren County, and to the State, it means more than words can impart. Go to it Western, and remember what U. of L. did to Ogden and make Saturday a track meet; that's what they did to Ogden when Ogden had a lean year, and Fred Koster ran wild. Broderick, we hope you make ten touchdowns, and to the rest of the best S.I.A.A. team in the South we know you will "strut your stuff."
