All Roads Lead To Louisville During The Week of K.E.A., April 22

J. L. HARMAN ADDRESSES CHAPEL

Education and its relationship to society and the nation.

SUMMER SCHOOL

What will the Summer School mean to you? Will you expect too much or too little from your courses? Will you use what you learn? First, because you can expect too much. The Summer School is worth your while if you are an education major. The Summer School will be exactly what you make of it. Second, because you may not expect too little from your courses. The Summer School commander will conduct the courses for you. The Summer School is not a place to get lazy but a place to get busy.

ELECTRICITY MEANS MUCH TO PROGRESS IN KENTUCKY

Where shall we have plenty of electric power shall have progress - natural resources developed, roads and schools and roads a better standard of living.

The average consumption of electric power has been increased by the Kentucky Utilities Company and the development of new, central and western Kentucky. Today, with the advent of the new, modern electric plant, the rates have been reduced to an all-time low.

The total cost of electricity has been reduced by a third. The electric power is now available at any time of the day or night.

The new, modern electric plant now also supplies the needs of the Kentucky Utilities Company and its subsidiaries throughout the state.

It is estimated that the savings on electricity alone will amount to several million dollars per year.

**DO YOU WANT A GOOD TEACHING POSITION FOR THE YEAR 1925-1926?**

You may not need the assistance of any eligible students, but if you do, right here in your town is an agency that has been waiting for this position for years. We have been assisted in this work in the past by a few good men and women, and we are expecting more of the same kind to fill the positions that are now open.
