Dick Powell says: “At Little Rock College, Ark., I began singing with a small choir. This was followed by dance-orchestras jobs all over the Mid-West — and finally to Hollywood. After 45 pictures types were used, finally the character was "created". I finally won a tough guy role — and really got going!”

When students burn the midnight oil, they smoke for one simple reason — enjoyment. And smoking enjoyment is all a matter of taste. Yes, taste is what counts in a cigarette. And Luckies take better.

Two facts explain why Luckies taste better. First, L.S./M.P.T. — Lucky Strike means fine tobacco...light, mild, good-tasting tobacco. Second, Luckies are actually made better to taste better...always round, firm, fully packed to draw freely and smoke evenly.

So, for the enjoyment you get from better taste, and only from better taste, Be Happy—Go Lucky. Get a pack or a carton of better-tasting Luckies today.

The latest college survey shows: Luckies taste better. They're tops with all the smart coeds, as well as with the man.

First Of Three Education Meetings Held At Western

The first of three regional conferences of the state Association of Student Teaching was held recently on the campus.

The theme of the conference was "Building Quality into Professional Laboratory Experiences in Teacher Education." More than 100 representatives from 11 teacher-training colleges throughout South Central and Western Kentucky met to devise ways to bring better teachers into the teaching profession by improving the training of those preparing to enter the profession.

Eight professional organizations in the education field cooperated closely in making the conference possible.

The AFT, headed by Miss Louise Combs of the State Department of Education, is endeavoring to raise the standards of education in Kentucky as set forth by the newly passed minimum-foundation bill in the General Assembly. The bill focused attention more than ever before upon the quality of classroom instruction.

Two widely-known educators, Dr. Paul B. Grinn, of the University of Minnesota, and Dr. Paul J. Hilliard, of the University of Florida, addressed the conference.

Dr. Grinn, president of the National Association for Student Teaching, emphasized that, in spite of the shortage of teachers, the election of good students for teacher education is of uppermost importance. He outlined high standards of selection for and selection of students who want to become teachers were outlined.

Dr. Hilliard stressed training of the student teacher. He stated that in order to build quality into teacher preparation, there must be constant and continuing experience in working with children both in the school and in community situations. The only experience in campus training schools is needed but also work in public schools.

All phases of the meeting stressed that the teaching profession must start in the first grade and continue through high school to encourage the better students to enter the teaching profession.

The Ohio County club, a newly organized club for students from Ohio County, has invited the high school seniors of Ohio county to visit the Western Campus.

This idea of good living and fun is what Harry Peterson has always been used to doing, whether it’s as a young man in the Air Force or as a young man in the Air Force, he has always enjoyed the company of others and has been known to make them laugh. He has always been a true friend to everyone he has ever met, and his good nature has always been evident.
