Fall 2000

Homecoming 2000

Our homecoming activities, **Saturday, October 14 at 12:30 PM**, will be highlighted by a luncheon in the Garrett Conference Center Ballroom. We hope you will make plans to be there. Dr. Jim Martin will MC the program and our department awards will be presented. Tickets are $12 each, payable at the luncheon. **To make reservations please phone (270)745-3151 or send an e-mail to: agriculture@wku.edu.**

WKU-Ag Needs You

You might think that when you leave “the hill” your presence will not be missed.....WRONG. Former students, regardless of whether you graduated or just spent a few semesters here, are the strength of our existence. We need your support, both in your local community and here at WKU-Ag. Let me point out a few ways you can support our program.

**Recruiting:** As the number of people involved in farming decreases we find that fewer of our students have a farming background. This should not be a hindrance for a new student coming into one of our programs. In fact three of our biggest programs are golf course and turf management, horticulture and pre-vet. Currently about 50% of our students have no farm experience.

You can tell interested prospective students about WKU-Ag and our practical applied programs. Be sure and let us know of junior or senior high school students who may have an interest in our programs. Our areas of concentration include; Ag - Business, Ag-Education, Agronomy - plant science, Agronomy-soil science, Animal Science, Dairy Science, Horse Science, Horticulture, Turf and Golf Course Management, General Agriculture, Pre-Forestry and Pre-Veterinary Medicine. We hope to add Biotechnology in the Fall of 2001.

**Jobs:** Keep our students in mind when looking for future employees in your business, schools, government or other opportunities. We continue to hear how well our students do in the agribusiness and teaching areas. Auburn University tells us that our students continue to be at the tops of their classes in the College of Veterinary Medicine. Students who are willing to relocate are in demand in the job market. We are encouraging our students to learn Spanish as their first foreign language because of the increase in the number of Hispanic speaking workers involved in production agriculture.

**Financial:** Universities everywhere are looking to non-state funding for support, WKU-Ag is no different. Our university funded faculty development funds are almost non-existent. These funds are used primarily as sources of funding for faculty continuing education. The amount of money available for each faculty member is not enough to pay for even a round trip ticket, meeting registration and lodging at a scientific meeting. Your contributions provide a source of funds for faculty development and new equipment. This year we were able to purchase two digital projectors and a camera overhead projector with your contributions. When you receive a phone call or mailing from the WKU fund raising office please do the following;

1) tell them you want your contribution to go to Agriculture;

2) think about how your contribution can help our program;

3) we appreciate all donations, if you can send us $100, $200 or more it will greatly assist our
I'm sorry I will miss homecoming this year due to a commitment made three years ago to participate in a meeting in the Netherlands. I hope all of you enjoy the activities, football game and friendship.

**Summer Class in Ecuador!**

Imagine freezing at the equator in mid-July while learning about agriculture in the Andes! WKU agricultural students participated in AGRI 475 - Development Issues in Ecuador, including a twelve-day Field Trip to the Andean Region of Ecuador. Topics explored included: floral exportation, dollarization of the economy, potato and dairy production, culture including fiestas and bargaining at Indian markets and participating in the first Leaders of Agriculture in Ecuador (LAE) International Leadership Camp. Participants included: Kent Anderson, Lyndsay McCaslin, Kristi Broadbent, Jamie Guffey, Jose Santiago, Daniel Smith, Jay Morgan and Brenda Oldfield. Another trip is planned for Spring Break of 2001!

**Student Teachers**

The following students completed Student Teaching during the Spring Semester:

<table>

In the Spring of 2001 student teachers will be in the school the entire semester coming back to campus for a Seminar on Friday of each week! An interesting
change is the alternate school year where schools operate on a 9-week basis with a 2-3 week break in Fall, Christmas, and Spring. About three of four systems in Central and Southern Kentucky are now on Alternate School Calendars. Block scheduling and KERA initiatives are also new for many alumni.

**Congratulations, New Teachers!**

**PLOW Keeps Plowin’**

Project PLOW (People Learning Others Ways) is a grant sponsored by the USDA “Fund for Rural Development” designed to encourage producers to learn more about Spanish language and Latino culture and workers to improve their knowledge of English and US culture. The project was piloted two years in Daviess County. This year PLOW classes are being held in Logan, Russell, Barren and Hancock Counties. For more information call David Coffey at (270) 745-5962.

**Soil Judging**

For the first time WKU had a soil judging team compete in the Southeastern Regional Competition of the American Society of Agronomy Contest held last Fall at Richmond, KY. As a first year team competing against several land grant and regional universities, WKU placed in the top 10. Team members included: Amanda Canty, Andy Mathias, Tony Oakes, and Meredith Newton. This Fall we have six students participating in the competition that will take place in Cookeville, TN on October 27. These students are Amanda Canty, Andy Mathias, Josh Major, Ian Crockett, Jason Groves, and Autumn Holloway.

**Vegetable Research**

For the past two summers my (Dr. Becky Giltillen) research has focused on vegetable crop production utilizing four different fertility treatments: surface leaf mulch and inorganic fertilizer, inorganic fertilizer only, organic fertilizer, and ½ inorganic + ½ organic. Vegetables investigated this past Summer include: tomatoes, green peppers, banana peppers, and green beans. Data were gathered on soil samples for soil moisture, nutrient content, and pH. Crop yield and leaf nutrient content were also quantified. Several faculty, graduate students and undergraduate students have assisted in gathering data for these experiments. These people include Dr. Todd Willian, Dr. Byron Sleugh, Dawn Ovesen, Summer Dixon-Ovesen, Chad Goldman, and Dan Wilhoit.

**Forage Research**

Two forage research projects were initiated in the Spring and Summer this year.

**Grazing alfalfa study:** six varieties of grazing alfalfa are being evaluated for grazing tolerance and stand persistence for possible use on the WKU farm. This is an exciting project initiated by Curtis Mitchell, the WKU Farm Manager. We have gotten three harvests off the field so far this season and will begin grazing next Spring. Stop by if you can, it is located on the east side of the dairy, off Bennett Lane.

**Warm Season Grass Project:** This is a USDA funded project to determine if warm season grasses can improve soil conservation by lowering erosion more than traditional fescue pastures. Demonstration plots with four warm season grasses (Indian grass, Switchgrass, Big Blue Stem, and Eastern Gamma Grass) were also established. Establishment of these plots was severely affected by the drought and weed competition. We may have to reseed next year.

We recently acquired some new audio-visual equipment to augment our teaching/research and other activities. We now have two new Epson 7500C digital projectors and an Elmo document camera/projector. These will go well with the two new laptop computers that were bought earlier this Summer.

The Elmo will give added flexibility to our faculty as
it can eliminate the time consuming task of passing-around-the-class of a single object or sample. Plus, you can put textbooks, pictures, seeds, plants, etc. on the Elmo and project it on the screen in clear, sharp 3-D.

The two new digital projectors mean we have a total of three digital projectors for our use (the Proxima still works). There is also an A/V cart that was purchased through the Dean’s Office for use in the Environmental Science and Technology Building.

**Turf Club and Research**

The Turf Club at Western Kentucky University was formed in 1996. The first club president was the department outstanding senior of 1999, Mr. Scott Schiebert, currently holds an assistant superintendent position at Valhalla Golf Course. Crag Mylor and Dave Knox were the past presidents of the club in 1997 and 1998, respectively. Currently, Jeremy Lee is the president of the club. The other officials are Brady Doran (vice president), George Stiles (treasurer), and Matt McCaslin (secretary). The club officially belongs to the national Golf Course Superintendent Association of America (GCSAA) as a local chapter. In the last four years, the club organized the members to attend three national GCSAA meetings and four local meetings. In the past four years, the club has raised over $8,500 from different activities including special projects at local golf courses such as aerification of greens and tees and donations received from the turf industry to support their trips. The club members have received more than $19,000 in scholarships from Kentucky Turfgrass Council and Kentuckiana Golf Course Superintendents Association in the last four years. Mr. Aaron Mathews, graduate student of turfgrass science, representing the Western Turf Club won the highest score in the GCSAA national meeting in the Turf Bowl Competition. Currently, the club is preparing for the next GCSAA meeting in Dallas and the KTC meeting in Covington this Fall. The turf club hosted one Kentucky Turfgrass Council Board meeting in 1999. Dr. Haibo Liu, Mr. Pete Dotson, and Dr. Jack Rudolph serve as the club advisors.

In the last four years, the turfgrass program at Western has become the largest turf undergraduate program in Kentucky and received close to $200,000 external funding which has significant impact to our program. The research of turfgrass science at Western include several exciting activities. 1) The writing team (Dr. Haibo Liu, Dr. James Martin, Dr. Jack Rudolph, and Mrs. Joan Martin) has been working on a national high school turfgrass education curriculum since last November with $149,300 in funding from the National Council for Agricultural Education. 2) The graduate level of education of turfgrass science at Western has been initiated and currently we have two graduate students, Mr. Aaron Mathews and Ms. Whitney Elmore. 3) Recently, we have received a USDA fund of $15,000 on a research project of national Kentucky bluegrass evaluation under shade conditions for next three years. 4) In the last four years, we have received $23,500 from Kentucky Turfgrass Council, Kentuckiana Golf Course Superintendent Association, Novartis, and The Scotts Company for research projects and maintaining the two hole golf course located at the WKU Farm. The turfgrass program has received donations of fertilizers, pesticides, and irrigation supplies in a total amount of more than $11,000 from Novartis, The Scotts Company, Andersons, Toro, and Rain-bird. 5) Current research projects include lower soil pH study at Lincoln Homestead Golf Course; low nitrogen input with compost materials for creeping bentgrass fairways; plant growth regulator application on seeded Bermuda grass cultivars; localized dry spot on creeping bentgrass greens; and aluminum tolerance of turfgrasses. Our goal is to focus on applied research in the transition zone with both cool-season and warm-season turfgrasses and enhance the turfgrass education program by providing our students with the most updated knowledge and training.

**Taylor Center Face Lift!**

Well things are hard to get started but once they start improvement is easy to spot. The front of the Taylor Center was badly damaged by the hail storm that has faded from recent memory. We are replacing siding, windows and adding a new front porch. The inside has also been improved by making the classroom larger by removing an interior wall. Stop by and see the changes.

**Current Graduate Students**
Matt Deppe is from LaMotte, Iowa and is working on a thesis project under the guidance of Dr. Gordon Jones. Matt's thesis research focuses on swine reproduction. Matt also assists Dr. Jones in teaching freshman and sophomore level animal science classes and laboratories.

Dawn Ovesen, from Magnolia, Kentucky received a B.S. in Agriculture from WKU in May 2000 and is beginning her graduate classwork this Fall semester. Dawn's thesis research focuses on morning-glory control strategies in GMO and non-GMO soybeans. Dawn's major advisor is Dr. Todd Willian.

Whitney Elmore is from Lucas, Kentucky and is working on a thesis project under the guidance of Dr. Haibo Liu. Whitney's thesis research focuses on management of hydrophobic soils in turfgrass.

Aaron Mathews, from Russellville, Kentucky received his B.S. in Agriculture from WKU in 1999 and is currently investigating compost addition to bentgrass golf greens under the direction of Dr. Haibo Liu. Aaron's recent activities include a Summer European tour and being awarded the 2000 Turf Bowl Champion.

Mona Rhodes hails from Owensboro, Kentucky. Mona received a B.S. in Elementary Education from Brescia College and has recently began a M.S. degree under the direction of Dr. Jim Martin. Mona's thesis research will focus on pruning techniques versus growth regulators for controlling the height of selected herbaceous perennials.

Emily Troyer, from Sugarcreek, Ohio received a B.S. in Agriculture from WKU and is currently pursuing a M.S. degree under the direction of Dr. David Stiles. Emily's research investigates constructed wetlands as a waste management option. Emily is currently working for the National Institute for Animal Agriculture.

Amanda Canty, from Clinton, Kentucky is a recent WKU graduate (B.S. in Agriculture, May 2000) and began graduate classwork this Fall semester. Dr. Becky Gilfillen is directing Amanda's thesis research which will investigate soil properties related to poultry litter application to orchardgrass pasture.
the Ph.D. in meat science at Texas Tech University in Lubbock, TX. Jessica serves as a research and teaching graduate assistant in the Department of Animal Science at Texas Tech. Her dissertation research deals with the attributes of pork from "free range" pigs as compared to conventionally reared pigs. Jessica graduated with the B.S. (1996) and M.S. (1998) degrees in Animal Science from WKU. She is from Larue County.

Doug Newcom, a 1999 WKU animal science graduate, has just completed course work for his M.S. degree in swine breeding from Iowa State University. He has held a research assistantship while working on the M.S. degree, and he has just been awarded an assistantship to pursue the Ph.D. degree in swine breeding at Iowa State. Doug’s hometown is Winchester, IN.

Amanda Ramer has just enrolled at Iowa State University to pursue the Ph.D. degree in Immunobiology. She was awarded both a research assistantship and a tuition scholarship for her outstanding undergraduate record at WKU. Amanda received the B.S. degree from WKU in May, 2000 with a major in biochemistry and a minor in animal science. She won the 1999 National Block and Bridle Club Award as the Outstanding Junior in the U.S. and she is a finalist for the Outstanding Senior Award, which will be announced at the National Convention in November.

During their senior years at WKU, each of the above students won scholarships to attend the International Livestock Congress Beef Cattle program in Houston, TX. WKU is the only university east of the Mississippi to have had a recipient for each of the first four years of this prestigious program.

**WKU Turf at Valhalla**

If you attended the 82nd PGA Golf Championship in August or watched it on national television, and you were impressed with the well manicured Valhalla Golf Course, WKU students and faculty were involved.

WKU Turf students Brad Moody of Franklin, KY and Ray Thompson of Cox’s Creek, KY were Summer co-op students at Valhalla. Moody and Thompson devoted their time at Valhalla mowing greens, tees, and fairways. They also maintained bunkers, areas around the tees and greens, applied pesticides, and coordinated irrigation. Each were responsible for three holes.

What is most significant about this co-op project with Thompson and Moody is that they were training at one of the best golf courses in the nation; there was not margin for error in their work.

Mark Wilson, superintendent of Valhalla’s golf course, said both students did a fine job. Scott Sickert (Dec. ’99 grad of WKU’s turf program) is also working directly under Wilson as assistant superintendent.

Haibo Liu and Pete Dotson, faculty in Western’s turf program, joined the grounds crew as volunteers. Both faculty donated services a week prior to the PGA championship as well as the week of the tournament. Dotson mowed fairways and Liu mowed tees. Retired Ag faculty member, Jim Worthington, mowed practice tees as well.

Two additional students and a recent graduate came in the week of the PGA championship to join the 60+ volunteers and regular work crew at Valhalla. The daily challenge of the crew was to have everything ready for play by 7:30 each morning. Even with a 3.5" rainfall early Friday morning, play was delayed by only one hour! This was only possible because of the large number of staff and volunteers. Of this group there was a total of nine Western students, recent graduates, and faculty. Western had a significant presence at Valhalla in August.

**Agricultural Ambassadors**

The Agricultural Ambassadors have become a very active and effective group of the department’s finest students. They represent us in a number of ways including recruitment dinners, FFA events, school visitations, etc. They invest a lot of time in contacting prospective students by phone and helping with our fund raising calls. They conduct tours of the farm, meet families of prospective students, and plan and stage our Welcome Back Party each Fall semester.
You will get to meet most of them this year at our annual alumni luncheon on October 14.

As part of their training, all but one of the Ambassadors and their advisors (Jim Martin and Gordon Jones), went to San Luis Obispo in January for the annual conference of similar groups. Our Ambassadors were called on to do a presentation for the conference, demonstrating their highly effective techniques of phone recruitment.

This year's Ambassadors are Kristie Broadbent, Dana White, Joe Thomas, Caryn Rager, Sarah Sallee, Ryan Wonderlich, Brad Morehouse, Emily Hartzell, Ang-“e” McGinnis, and Jeremy Lee. Advisors are Gordon Jones and Byron Sleugh.

Great Garden's Tour of Europe

This Summer a group of 20, headed by Jim Martin flew to Brussels, Belgium to begin at two week, whirlwind tour of some of Europe’s finest cities, and great gardens. Former Department Head, Luther Hughes, and his wife Brenda were part of the group. Luther functioned as an assistant to the talented leader, and gained excellent experience that will surely make him a more effective Associate Vice President.

The tour took us to Amsterdam, Frankfurt, Paris, Canterbury, and London with many other stops along the way. For students, it was a life-changing experience learning to deal with so many countries, customs, and currencies in such a short period of time. What tied it all together was an excellent driver from the Netherlands who met us at the airport and was with us the entire trip. He bonded well with the group and provided us opportunities we might not have had otherwise.

The gardens we visited were spectacular, they fill you with inspiration and joy. The rich array of flowers throughout Europe add so much beauty to these old, venerable cities. For a horticulturist, it is an eye opening experience, and motivates us to do a better job of implementing great gardens here at home. Look of new development!

One of the spectacular events was attending the flower auction in Aalsmere, not too far from Amsterdam. The scale of the facility in which the auction is held is mind boggling. The daily auctions of cut flowers and potted plants are in the millions of dollars with goods being purchased and shipped around the world. The variety of plants and flowers is a challenge to identify, even for a talented teacher.

We were in the Netherlands the night the national soccer team was playing their semifinal game in the Euro 2000. Everything was orange - shirts, skirts, awnings, beer (I just made that up), but everywhere you looked the national colors were being displayed. It was a party night, but unfortunately they lost! Still a good time had by all. As a side note, we were in Paris when France won the championship, that was a wild night! They really take their soccer (football) seriously.

A Rhine River cruise in Germany to see the vineyards coming down the hillsides was spectacularly beautiful. The castles interspersed among the vines were picture post card perfect. The Palmengarten in Frankfort was one of the finest all around gardens we visited and is a must see if you are ever in the area.

The intimate and luxuriant gardens of Monet at Giverny are a sheer delight. To walk among the plants immortalized by this famous impressionist left us all with a life long impression.

We went to England by way of the Chunnel. Our coach drove right into a railroad car and was transported under the English Channel in a manner of minutes. It is an amazing engineering accomplishment, though not the most scenic way to see the Channel.

One of the most memorable sights was coming up the English side of the Channel and seeing that serene landscape. It reminded me of a movie I once enjoyed, “This Garden England”; all of England is truly a garden. At Hampton Court we saw the most fantastic display of gardens and plants you can imagine as part of their annual garden festival.

All in all, it was an exciting adventure for all the participants. It was my seventh trip to Britain and Europe and it was as exciting, perhaps more so, than
any I have taken. International travel should be a high priority for college students. This is how they learn to navigate in unfamiliar waters. This is how many will now be able to seek employment and careers outside of their own country.

**Block and Bridle**

The 1999-2000 academic year was a very successful one for the Block and Bridle club and its members continue to be very active! Highlights of the year included the Little North American and a trip to Atlanta for the annual national convention. At the convention, Amanda Ramer received the Outstanding Junior award. This is the second award of this type in recent years as Charles Farber was named the Outstanding Senior just two years ago. Amanda is also a top-three finalist for the Outstanding Senior Award; final results will be announced at the 2001 Convention in St. Louis. Additionally, WKU's B&B Chapter received second place in the category of chapter activities.

Fall always marks the beginning of a new year and Block and Bridle Initiation Week. The club will maintain a week of activities designed primarily for new students concluding with the Initiation Banquet on September 13. We are excited about the upcoming year. The club will stay active with Homecoming, barbecue events, highway trash maintenance and other community service projects.

The year 2001 will mark the 25th Anniversary of the WKU Block and Bridle Chapter, and many B&B alumni have expressed interest in attending a reunion or Anniversary Celebration. We are excited to announce that the event will be held as a part of the 2001 Little North American and B&B Banquet on April 7, 2001. Each “identified” alumnus will receive a letter in a few weeks outlining more details of the event; however, the alumni list is not complete. If you are a B&B alumnus and would like to attend the event, please send a card or note to Dr. Jones at the WKU Department of Agriculture.

Officers for the 2000-2001 Academic Year are as follows:

President: Ryan Wonderlich
Vice President: Casey Shaff
Secretary: Margie Zoglmann
Treasurer: Amy Jo Fourshee
Executive Assistant: Brad Morehouse
Marshall: Chris Nalley
Report: Chad Wilson
BBQ Chairs: Craig Black/Ryan Miller
Social Chairs: Amanda Oates/Ashley Tudor
New Member Ambassador: Clint Steele
Alumni Secretaries: Kammie Jackson/Melissa Kron
Scrapbook Chair: Emily Hartzell
Advisors: Dr. Gordon Jones/Dr. Nevil Speer/Dr. David Stiles

We look forward to seeing all of you at Homecoming!

**Agriculture Business Club**

The Agriculture Business Club is a student organization open to all majors here at Western Kentucky University. The emphasis on the club is on the business aspect of Agriculture. The faculty advisor is Dr. Al Bedel. This past year the student President was Brad Lacefield and Vice-president Josh Detre. Last Fall the club took an educational field trip to Chicago, Ill. Twelve students from Western went to Chicago and visited the Chicago Board of Trade, Mercantile Exchange, Sears Tower, Shedd Aquarium, Museum of Science and Industry, and Federal Reserve Building. This trip was perfect example of the effect of Agri-business has in the real world. The club also had a few guest speakers that spoke on their views and past experiences with Agriculture. The club is planning for another trip this Fall and other activities. If there are any questions regarding this club, please contact Dr. Al Bedel.

**Ceres Women’s Fraternity**

Ceres Women’s Fraternity has a busy schedule for the Fall 2000 semester. We are coming off of an exciting year last year which is highlighted by our participation in our first Greek Week Tug-of-War and coming out the winner. This Fall we have eight new pledges that should be a good addition to the fraternity. The semester is also full of several Sisterhood functions that have been planned and a Night of Awareness.
We are planning on having an Association meeting on October 14 (Homecoming) at 10:00 a.m. with a light breakfast being served. All Ceres alumni are welcome to attend our Founder’s Day Chilli Supper, November 19, which is being planned to celebrate the day we chartered.

**Alpha Gamma Rho**

Over the past year the brothers of Alpha Gamma Rho have recruited 20 new brothers. We have worked hard to carry on our great tradition as Greek Week champions another year, making it 16 in a row. Last Fall we conquered the overall championship of homecoming with the sisters of Alpha Delta Pi. We also started a new fundraising event with the Dream Factory. We designed a very unique event known as “The Race for Dreams” which was held at Race World on Scottsville Road. Through this fundraiser we were able to provide families with computers and for one family they were given a trip to Disney World. So with these small steps in winning and helping out people in need we were able to keep the great Green and Gold of Alpha Gamma Rho alive by working hard and never giving up.

---

**AGRICULTURE ALUMNI**

We want to hear from you and to share your news with other alumni. Send us your news on this form to the address below. Enclose another sheet if you have additional information.
