Stone Columns at entrance of New Vanmeter Hall and Administration Building, Western State Normal. The landscape seen for miles in every direction from this point is one of the most attractive in America. A beautiful stretch of country beyond the columns is shown in the picture.
New Vanmeter Hall and Administration Building, Western Kentucky State Normal School. One of the most attractive fire-proof buildings in this country. It has an Auditorium with a seating capacity of 2,000 and many administration and class rooms. This building was dedicated May 5, 1911.

Judge J. P. Haswell, Regent
The contribution of 187 Corn Club Boys of Warren County. This display was made at the Warren County Rural School Fair which was under the direction of Superintendent E. H. White. One of the best means of improving rural schools is by interesting the folks at home in what the schools are doing. Dr. Frederick Mutchler, head of the Science Department of the Western Normal, is State Agent of Kentucky for the National Government and has charge of the Corn Club work of Kentucky. Great results are being accomplished. Four thousand boys in Kentucky are demonstrating that they are better farmers than their fathers. Yields of more than one hundred bushels per acre are becoming common among the Corn Club boys.

The kind of corn that wins prizes. Reckon the value of this in the making of a better rural life, grown under careful directions and school supervision. The above is a part of a display of corn made on Normal Heights on October 26, 1912.
Third grade children weeding their lettuce beds. During the past season the following crops were cultivated by the different grades: second grade, radishes; third grade, lettuce; fifth grade, beans; fourth and sixth grades, tomatoes. Besides a share of the products which the children took home, vegetables were sold to the amount of $35.00. Some of the beans and tomatoes raised were canned by the older girls in the classes in Domestic Science.

TAILORED SHIRT-WAISTS—Work of Students.

Particular attention is given to the designing of pattern and also drafting from measurements. A trial waist is made and fitted, thus securing a perfectly fitted pattern. This work is done the first half of the fourth term in the School of Domestic Science and Arts of the Western Normal.

Entrance to Mammoth Cave, the World's Greatest Natural Wonder; Two Hundred Twenty-five Miles of Explored Routes. Sixty Minutes' Ride from this School.
OUTING SCENES.
TRAINING SCHOOL DOMESTIC SCIENCE CLASS.

During the summer school the girls from the fifth, sixth and seventh grades enter this class. Two years of regular work are given to the sixth and seventh grades. Special arrangements are made for practice teaching in this department.

CORSET-COVERS—Work of Students.

The second term’s work is devoted to the practical application of Domestic Arts as studied in the first term. These corset-covers were designed and made from patterns drafted according to measurement. The work is all done by hand.
STUDENT-BODY ASSEMBLED ON RESERVOIR HILL AFTER A WALK FROM NORMAL HEIGHTS, MAY, 1910.
"ALL ABOARD" FOR THE STUDENTS' ANNUAL EXCURSION!
Building 8 occupies the location of the present Potter College building. The building has been remodeled and made into handsome class rooms. Building numbered 1 is completed and is now occupied by the School. It was dedicated on May 5, 1911.

This plant is being constructed in honor of CHILDHOOD, and well, when completed, reflect the statesmanship and patriotism of the Commonwealth of Kentucky. The Regents are pursuing a policy that will invest every dollar paid by the taxpayers of Kentucky and appropriated by the General Assembly to the institution in such a way as to make it contribute its full value to the State, not only now, but for decades to come. They are putting every dollar into a new plant that will have, at its completion, economy, convenience, harmony, and sanitation. The Regents submit the completion of this patriotic enterprise to the people of Kentucky, fully realizing that it will take time to finish it.
