Coal Science Exchange Gets $50,000

Western Kentucky University's Coal Science Exchange Program has received a boost from one of the country's leading manufacturers of coal analytical instrumentation. President Meredith and Dr. John Riley, director of Western's Center for Coal Science, announced that they will donate $50,000 over four years to establish an endowment to assist the exchange program with the China National Coal Corp. (CNCC).

"This is a very exciting day at Western," Dr. Meredith said at a news conference. "This is another example of business-university partnership expanded to an international basis."

While Kentucky is the largest producer of high BTU coal in the U.S., Warren said, China has one of the largest reserves of coal in the world. "Science and technology and working together on this program should benefit all our peoples," he said, adding the project will help bring the countries together.

Dr. Zhongyuan Shan, deputy director of CNCC's production department, said the endowment will help further promote cooperation between Western and the Chinese coal institutions. "We will try all our best to develop and strengthen the relationship and cooperation with Western. And I'm sure we will have very good technical cooperation with LECO Corp."

Interest from the LECO Corp. visiting professors/scholarship fund will be used to help pay living expenses for visiting Chinese scholars and graduate students to study at Western and travel expenses for WKU faculty to lecture in China and establish cooperative research programs, according to Dr. John Riley, director of Western's Center for Coal Science.

Through 1996, Western will annually provide funds equal to the interest generated by the endowment. The exchange program has been operating about four years, he said, but is in need of more funding for these expenses.

Western has also had a long-standing relationship with LECO Corp., Riley said.

"We're oriented toward the same things: coal analysis, coal testing and coal research," he said, adding that the University is using several pieces of analytical equipment made by LECO and purchased through grants. "They have always been cooperative in helping us secure the needed equipment."

Researchers Gather for WKU's 2nd International Coal Conference

More than 60 scientists from 13 countries are attending Western Kentucky University's Second International Conference on Elemental Analysis of Coal and its By-Products at Barren River Lodge through today.

According to Dr. George Vourvopoulos, chair, there are environmental reasons for the interest in analyzing coal and its by-products.

"Coal is very heterogeneous, and unlike any other mineral or organic compound, there is not a single chemical formula that could describe its structure," he says. Thus, other than carbon, the makeup of coal depends upon the way the particular coal was formed and the geological setting where it is found.

"These various elements greatly influence the characterization of coal, and determine its uses," Vourvopoulos adds, and an example of knowing its contents, such as carbon, nitrogen, oxygen and ash, it then becomes possible to determine its heating capacity. "Sodium and chlorine are corrosive elements, and their presence in large quantities in coal is detrimental to boilers and piping," Vourvopoulos explains, adding that while we are all familiar with the environmental impact of sulfur, "other elements such as aluminum exist in coal in large enough quantities that it could become economically feasible to recover after the burning of coal."

Studying the content of Kentucky coal led Vourvopoulos to organize the first international coal conference to share ideas with other scientists about trace elements in coal, and the conference was a success.

"The key word again is the heterogeneity of coal. There are so many chemical elements present in a lump of coal that their determination, the correlation to each other, chemical forms and other things, can contribute to a better understanding of its structure," he says, adding:

"Knowing about coal means working toward solutions that can remove harmful elements, recover useful elements and produce energy with higher efficiency."

In Academic Year Opening Addresses

President Meredith Encourages Faculty...

The faculty and staff in higher education are in the "greatest profession," but one that is tempered with "awesome responsibility," President Meredith told faculty and professional staff at the opening faculty meeting Aug. 21.

Dr. Meredith said those in higher education must make wise use of opportunities they have with today's students.

"Everything we do sends an educational message to the more than 15,000 students who watch us everyday," he said. If teachers say it is all right to come to class late, it sends the message that it will be all right to be late for work, Dr. Meredith said.

="We have a great opportunity facing us," he said. "And we have an equally great responsibility."

Dr. Meredith said the 90s is also becoming the decade of volunteerism and a concern for other people, and he encouraged volunteering and the use of volunteers on campus.

In his remarks, which came on the day when residence halls opened and many of the University's students began to moved back to campus, Dr. Meredith said he was pleased with the quality of the students choosing Western.

Grade-point-averages, class rankings and college entrance test scores continue to rise, he said. "These are significant numbers and they (the students) will have an impact here at Western."

Dr. Meredith encouraged faculty to "turn it up a notch and push them harder. We want to get all out of them that we can get."

Indications are that enrollment will be steady this fall with the record enrollment of 15,241 set in the fall of 1990, he said.

"Things just keep happening positively on our campus," Dr. Meredith said. Enrollment is not the only number on the rise; external fund raising is also reaching record numbers.

More than $6 million in extramural funds or grants was received with about 78 percent of the grant proposals receiving outside funding, he said. In addition, private donations have increased 165 percent since 1988, with $1.2 million in development funds, $879,000 in athletics and $600,000 through the College Heights Foundation.

"People want to give to this institution because we represent quality and we're on the move," Dr. Meredith said.

The president also used the annual address to introduce more than 50 new faculty and administrative staff members.

...Promises Affirmative Action

President Meredith has reaffirmed the University's commitment to hiring and promoting minorities, including women.

Dr. Meredith, speaking to The Women's Alliance at its opening fall meeting, said, including women in affirmative action hiring policies is as important as addressing issues of color.

"I pledge to you a greater emphasis on that during this coming year, with the vice presidents, the deans and directors on down through the department level in terms of our hiring," he said.

As part of that emphasis, Dr. Meredith said he is forming a committee to draft a job description for an affirmative action officer so the University can advertise the position. Plans call for that position to be full time, he said, with the affirmative action officer also taking on training responsibilities.

Hiring minorities, both in the faculty and administration, is important, because they serve as a role model to the students, Dr. Meredith said.

"If we have been discriminate in our practices in terms of hiring women to a particular position on this campus and you're aware of that, you need to let me know about it," he said.

He also pledged to pay greater attention to the needs of the women already working on campus.

There are needs for women on this campus that need to be addressed and if they are brought to our attention, we ought to do something about it, Dr. Meredith said.

The University is also working on a policy addressing sexual harassment, the president said. That policy is "a little harder in some areas than I would like," he said. "I think we can get the point across without a baseball bat, but the point has to be put across."

Sexual harassment will not be tolerated at Western, Dr. Meredith said, but the policy has to be tempered so that it does not create an uncomfortable work atmosphere for those who are not causing problems.

The next Women's Alliance meeting is scheduled for Sept. 26 when the group will cohost a luncheon for the 5th annual Women Studies Conference at noon in the Garrett Conference Center. On Oct. 22, the Alliance will discuss "Women's Health Issues: ABCS for the '90s" with Dr. Kevin Charles, director of Western's Student Health Service, as the speaker.

Awards of Excellence

To celebrate the University's 1989-90 academic successes, President Meredith today honored faculty and staff with Awards of Excellence in three categories: individual excellence, team excellence and service excellence.

"I'm here to acknowledge the achievements of this faculty and staff this year," he said.

The University's awards were presented at the annual Awards of Excellence reception.

Individual Excellence

Dr. Amelio Salinas was presented the award for individual excellence in teaching.

Dr. Salinas, a professor of accounting, has taught at Western for 22 years. He is known for his enthusiasm for teaching and ability to help his students.

"His teaching is characterized by enthusiasm, understanding and an ability to coach the students," Dr. Charles said.

"He is an outstanding teacher," Dr. Meredith said.

Dr. Salinas was honored with a rainbow flower as the symbol of the individual excellence award.

Team Excellence

The Chemistry Department was honored with the team excellence award.

The chemistry department has won the University's top award in every category except individual teaching, Dr. Charles said.

The department has the highest departmental rankings in teaching, research and service.

According to Dr. Charles, the department has "an unselfish commitment to the University's excellence mission and an exemplary research record." The department has received grants totaling more than $500,000 in the past six years.

"Their work is a shining example of what we are trying to accomplish at Western," he said.

Dr. Meredith congratulated the Chemistry Department and said they are "outstanding." He also congratulated the recipients of the individual excellence award who were honored with gold flowers as symbols of the team excellence award.

Service Excellence

Dr. Vourvopoulos has been a member of WKU's Department of Physics and Astronomy since 1984.

"He has led a number of important, high-impact research projects," Dr. Meredith said.

"He is a former director of the Tandem Accelerator Lab and the Nuclear Research Center in Demokritos, a facility similar to the U.S. Laboratory at Oak Ridge, Tenn., and was a professor at Vanderbilt University in Nashville.

His international ties have prompted him to organize seven conferences prior to Western's international conference is to review some of the newest analytical methods, discuss their advantages and drawbacks, and in general, learn from each other's experience in determining the various elements found in coal."

Dr. Vourvopoulos is a member of WKU's Department of Physics and Astronomy since 1984.

And although he says we already know how to measure elements in coal, a conference such as Western's allows researchers to share newer methods with one another.

The purpose of our international conference is to review some of the newest analytical methods, discuss their advantages and drawbacks, and in general, learn from each other's experience in determining the various elements found in coal."

Dr. Vourvopoulos has been a member of WKU's Department of Physics and Astronomy since 1984.

The native of Athens, Greece, served with the Greek Atomic Energy Commission in Athens and is a former director of the Tandem Accelerator Lab and the Nuclear Research Center in Demokritos, a facility similar to the U.S. Laboratory at Oak Ridge, Tenn., and was a professor at Vanderbilt University in Nashville.

His international ties have prompted him to organize seven conferences prior to Western's international coal conference.

International Researchers Gather

WKU Gets $195,000 For ‘First Program’

Western Kentucky University has been awarded a $95,000 grant by the U.S. Department of Education to effect a system-wide restructuring of the primary grades in Christian County.

The "First Program" is funded for three years, and is related to the Kentucky Education Reform Act to implement the ungraded primary grades, according to Dr. James Craig, assistant dean in the College of Education and Behavioral Sciences.

"One of the criteria involved in the selection was Christian County's large number of rural, at-risk students, Craig said.

"In this professional development model, we work with teachers to implement this program to increase the achievement of these students and improve the quality of their educational experience," he said.

Craig will be working with Christian County teachers, assisted by Dr. Bette Burress, education specialist for Western's Center for Excellence for School Reform, and Dr. Robert Kennedy, an educational leadership assistant professor who will serve as an evaluator.

Music Is Reaccredited

The Department of Music has received reaccreditation from the National Association of Schools of Music (NASM).

According to Dr. John Duff, head of the Music Department, the accreditation process is quite extensive, involving two years of preparation, self-studies conducted by the department and visitation by NASM representatives who interview faculty members, administrators and students.

Western’s Department of Music was first accredited in 1948, and is reevaluated every 10 years, Duff said. The NASM has been designated by the Council on Postsecondary Accreditation as the agency responsible for the accreditation of all music curricula.

"Accreditation of the Music Department is a strength for Western, because it puts us in a better stance for recruiting faculty," Duff said. "Also, students are getting a quality music education and a stronger experience.

Duff said being a member of NASM in good standing is an indication that Western’s Department of Music continues to meet high standards associated with the granting of its undergraduate and graduate degrees.

Campus Child Care Is Reaccredited

WKU's Campus Child Care joins a very small percentage in the U.S. to be accredited by the National Academy of Early Childhood Programs which recognizes programs that meet national standards of quality.

To become accredited, WKU's Head Start and Child Care Center, which serves children from two to school age, met strict criteria related to providing age-appropriate activities, having well-qualified and trained staff, having an adequate staff-to-child ratio, meeting health and safety standards and offering opportunities for parental involvement.

Hall of Fame to Induct Inaugural Class This Friday

The WKU Athletic Hall of Fame will induct its inaugural class Sept. 13 at a dinner in Garrett Conference Center. There are 10 initial members—one coach and nine players—with additional members elected each year.

Members include:

E.A. Diddle, who coached men's basketball for 42 seasons, posting the third-highest victory total ever for a college coach with 759, against 302 losses;

Jimmy Feix, Western's first All-American, picked as a quarterback in 1952. Feix coached Hilltopper football from 1957 until his retirement in 1983 and was athletics director from 1985-91;

Dee Gibson, who starred in basketball and was an All-American guard as a senior in 1948. He was also a tennis standout;

Clem Haskins, who remains the only basketball athlete in the Ohio Valley Conference to win the league's Player of the Year award three consecutive years (1966-67);

Adele Gleave, one of the first women ever on athletic scholarship at Western and won a national championship in gymnastics in 1973;

Jim McDaniel, who led Western to the NCAA Final Four in 1971;

John Oldham, All-American basketball standout who succeeded Diddle as coach in 1971 and then was athletics director until 1985;

Bobby Rascoe, All-American basketball guard in 1962;

Max Reed, a football and basketball star in the mid 1930s, and

Nick Ross, eight-time All-American for track and cross country.

Tickets for the inaugural dinner and induction ceremonies are $25 and are available at the WKU Ticket Office, 5222.

LECO Grant

Continued From Page One

The CNCC is an organization similar to the U.S. Department of Energy, but on a much larger scale, Riley said. The Department of Energy operates laboratories, he said, while the CNCC operates entire universities that are well known and respected. "They are more diverse than the Department of Energy."
Sponsored Awards

Dr. Richard Ayres, Community College, $21,135 from the Kentucky Real Estate Commission for a grant to assist realtors in Warren and surrounding counties by offering workshops and seminars.

Dr. Jerry Boles, Community College, $220,860 from the Kentucky Cabinet for Human Resources to allow TOP UP at WKU to establish a year-round program to evaluate and encourage at risk students to graduate high school.

Dr. Ann Cline, Teacher Education, $27,163 from the Cabinet for Workforce Development to aid state vocational schools in implementing college-type schedules.

Dr. Dwight Cline, Educational Leadership, $8,802 from the Kentucky Department of Education to provide regional training workshops for a principal intern committee made up of state administrators.

Dr. David Coffey, Agriculture, $5,100 from the Kentucky Department of Education to provide workshops for agricultural education teachers.

Dr. Darwin Dahl and Dr. Blaine Ferrell, Chemistry and biology, co-directors, $3,657 from the Kentucky Academy of Science to conduct research which relates to the mechanistic roles of neurochemicals involved in regulation of circadian (metabolic rhythms) rhythms in the cockroach to determine the daily pattern of endogenous brain levels of octopamine in the brain of the cockroach.

Mrs. Nancy Givens, Student Health Service, $19,761 from the Kentucky Cabinet for Human Resources to conduct an evaluation study of implementing a campus alcohol risk reduction program.

Dr. Mary Hazzard, Nursing, $110,000 from the Council on Higher Education to continue allied health and nursing programs in Owensboro and Glasgow.

Dr. Stephen House, Institute for Economic Development, $71,807 from the Kentucky Cabinet for Human Resources to continue training of state social services personnel.

Dr. Lois Layne, Psychology, $131,600 from the Barren River Area Development District to provide services for the second year of an Adult Day Health Center.

Dr. Eula Monroe, Teacher Education, $37,683 from the National Science Foundation to fund the second year of a K-4 Math Specialists Project.

Dr. Kenneth Mussnug, Center for Industry & Technology, $129,490 from the Bluegrass State Skills Corporation to provide technical training for industry.

George Niva, Health and Safety, $19,488 from the Barren River Area Development District to provide a comprehensive fitness/training/education program.

Dr. John Riley, Chemistry, $19,488 from the Barren River Area Development District to provide a comprehensive fitness/training/education program.

Dr. John Vokurka, Teacher Education, $178,768 from the Kentucky Department of Education to provide 1992 funding for the Diagnostic Network which provides services to handicapped children and youth in 15 area counties, plus personnel development for teachers, administrators, school personnel and parents.

Dr. Wieg Vandermeer, Physics and Astronomy, $16,329 from the American Heart Association for a second year project for improving measurement techniques of membrane fluidity by using fluorescence techniques.

Dr. George Vourvopoulos, Physics and Astronomy, began work in August 1990 on a project with Oak Ridge national Laboratory. The U.S. Department of Energy provided initial support of $150,000 to Oak Ridge for the development of a detection device for hidden explosives in items such as luggage, briefcases, letters, packages, air and sea freight, and treaty-limited items. Interest in this project extends to the U.S. Secret Service, the International Terrorism Protection Agency and the Chemical Treaty Verification Group. Co-principal investigator with Dr. Vourvopoulos is Dr. Fred Shultz of Oak Ridge National Laboratory.

The Office of University Relations regularly solicits news tips regarding faculty activities, achievements and awards. To submit news items for external media consideration, contact Bob Skipper (2295).

Mellon Fellowships in the Humanities Program

In an effort to help meet the need for talented teachers to replenish college and university faculties in the decade ahead, the Mellon Fellowships in the Humanities program welcomes nominations of truly outstanding seniors or recent graduates who wish to begin graduate work in preparation for a career of teaching and scholarship in a humanistic field of study.

Fields eligible are the traditional humanities disciplines, including history, but not the creative or performing arts. Not included are the social sciences or professional fields such as education, law, library science and social work.

High grade-point averages and GRE scores are not the sole measure of excellence sought. In addition to intellectual ability, the regional and national selection committees are looking for evidence of personal characteristics likely to contribute to effective teaching, including "breath of interest, liveliness of mind and spirit, and the ability to communicate."

The stipend for Mellon Fellows entering graduate school this fall is $12,500, plus payment of all tuition and standard fees to their graduate schools. Candidates must be nominated by a faculty member and the deadline is Nov. 4. Call Dick Troutman, 3841.
Helen Knight, University Archivist, Is 'At Your Service'

At your service is Helen Knight, university archivist, assisted by Ann Williams, in Room 100A of Helm Library.

If you're interested in records of historical significance, you'll want to take a look at Mrs. Knight's collection, which is available to faculty and staff Monday through Friday from 8 a.m. until 4:30 p.m.

University Archives is the official repository for WKU records, including the existing records of the genealogical antecedents of Western, such as Ogden College, Southern Normal and Porter College.

University Archives consists of both manuscript and non-manuscript materials, and the collection includes minutes of Board of Regents meetings, presidential papers of all of Western's presidents, university publications, non-current departmental files, scrapbooks, programs of campus events, photographs, slides, tapes, films, memorabilia and other items such as clippings and articles concerning the University and its personnel.

THE DEPARTMENT OF MUSIC PRESENTS

Sylvia Kersenbaum in 'Beethoven IX' This Sunday

Pianist Sylvia Kersenbaum will perform "Beethoven IX" as part of her Faculty Concert Series this Sunday, Sept. 15, sponsored by the music department at 3 p.m. in Van Meter Auditorium.

This cycle of Beethoven sonatas features Sonata No. 30 Op. 109 in E major and Sonata No. 31 Op. 110 in A-flat.

Tickets are $3. For more information, call 3793.

"Faculty publications are a distinctive record of the accomplishments of the University's faculty," says Mrs. Knight, adding: "The Archives strives to maintain an up-to-date collection of faculty professional papers. University faculty members are encouraged to donate materials to this collection."

Access to materials housed in the University Archives is provided through various finding aids in the Archives Reading Room. Materials are non-circulating, but upon request and approval of the Archives staff materials may be photocopied for a nominal fee.

Call Mrs. Knight at 4793, or visit University Archives in Helm Library 100.

Abracadabra!

The Kentucky Museum will sponsor Workshops in Magic for Children Saturday, Sept. 21.

Tom Hamilton, master of sleight-of-hand who performed at the museum's opening of Yesterday's Children, will conduct two workshops: 9-10 a.m. for ages 6-10 and 12:30-2 p.m. for ages 11 and over.

Call Dianne Watkins, 6082.

Development Committee Meets Monthly

The Development Committee will meet on the second Friday of each month to consider applications for funding.

Applications must be received in the Office of the Vice President For Academic Affairs by the last Friday of each month.

For application materials and guidelines, please contact the appropriate dean's office or Academic Affairs, 2296.

Semester Break Schedules

THANKSGIVING HOLIDAYS
The University will be closed Nov. 27 at 4 p.m. until Dec. 2 at 8 a.m.

CHRISTMAS HOLIDAYS
The University will close Friday, Dec. 20 at 4 p.m. and reopen at 8 a.m. Monday, Jan. 6.

SPRING BREAK
The University will close at 4:30 p.m. Friday, March 13 and reopen at 8 a.m. Monday, March 23.

OTHER HOLIDAYS
Jan. 20, 1992 Martin Luther King Jr. Day
May 25, 1992 Memorial Day
July 6, 1992 Independence Day

Next On Campus: Wednesday, Sept. 25
Deadline: Monday, Sept. 16
Send to: Sheila Eison, Editor, Wetherby Administration Building 119
College of Education and Behavioral Sciences

HOME ECONOMICS AND FAMILY LIVING
Dr. Martha Jenkins and Joyce Rasdall presented a research paper, "Name of the Association in the 90s," at the American Home Economics Association meeting in June. Dr. Rasdall was named 1991 Leader of the Year at the VIP Reception and served as chair of the technology committee. Dr. Jenkins was elected chair of the state nominating committee.

Potter College of Arts, Humanities and Social Sciences

ENGLISH

Dr. Sam McFarland Discusses His Study Of Soviet vs. U.S. Authoritarianism

In June, Dr. Sam McFarland, professor of psychology and director of the University Honors Program, made his third trip to Moscow to continue research with Drs. Vladimir Ageyev and Marina Abalakina of Moscow State University comparing the authoritarian personality in Russian and the United States. Dr. Abalakina taught at Western for the 1990-91 school year.

"Our main goals on this trip were to study how authoritarianism shapes Soviets' attitudes toward their own political leaders and events and to compare how authoritarianism in both countries influences how people believe goods and services should be distributed," Dr. McFarland said.

Based on a public survey, McFarland and his colleagues found that Russians who score high in authoritarianism still favor old-style Communist leaders and actions, while those who are low in authoritarianism favor Yeltsin and support progressive democratic movements.

"The strongest influence was on their attitudes toward the national independence movements," McFarland said.

"The higher their authoritarianism, the more Russians supported the military crackdowns in Georgia, Lithuania and Latvia, and the more they opposed independence for those national groups. People low in authoritarianism supported the Baltic and Georgian independence movements."

The study also compared Russian and American views of how salaries, education, medical care and luxury goods should be distributed.

"The Marxist norm for the last 70 years has been to base everything on equality, whereas the American free-enterprise norm has been laissez-faire individualism," McFarland said.

"We found that authoritarianism in both cultures strengthens adherence to the cultural norms. The higher Russians are in authoritarianism, the more they favor equality and oppose laissez-faire individualism. For Americans, it's just the opposite."

The Office of International Programs and Projects will feature McFarland and his wife, Cheryl McFarland of the Warren County Public Schools, in a forum Tuesday, Sept. 17 at 7 p.m. in Room 100 of the Garrett Conference Center. The McFarlands spent the spring semester of 1989 in Estonia, where he taught at Tallinn as a Fulbright Senior Lecturer.

HISTORY
Dr. Robert J. Antony presented "Fishermen, Sailors and Pirates in South China during the Mid-Qing" at the 84th annual meeting of the American Historical Association Pacific Coast Branch at Kona, Hawaii Aug. 16.

JOURNALISM
David LaBelle has been named outstanding photojournalism teacher in the nation as recipient of the Robin F. Garland Educator Award at the national Press Photographers Association's 43rd annual Joseph A. Sprague memorial Awards Banquet in Arlington, Va.

MUSIC
Dr. Colleen Reardon presented a paper in Italian entitled "Siena, Umanesimo e le prime composizioni sacre di Agostino Agazzari" at the conference celebrating the 750th anniversary of the founding of the University of Siena in June.

SOCIOLOGY
Fuad Baali organized two sessions on History of Sociological Thought for the Southern Sociological Society meetings in Atlanta.

Continued on the next page
Dr. Joyce Wilder is Recognized by President Bush for Volunteer Work

Twenty-five years of volunteer work with the deaf and hearing impaired has earned Dr. Joyce Wilder recognition from President George Bush and a trip to the White House to be honored.

In March, Dr. Wilder, assistant professor of psychology, was one of four recipients of the 1991 South Central Kentucky Jefferson Awards for public service.

In June, President Bush invited Jefferson Award local community winners to the Oval Office where he greeted each winner individually and emphasized his commitment to the importance of volunteerism and local community service.

The daughter of deaf parents says her inspiration to be an advocate for the deaf and hearing impaired came from her own experiences at home.

When she was given the award, presenters said Dr. Wilder "has made a significant difference in the lives of a special segment of our population...She has contributed immeasurably to the advancement of their cause. Her willingness to serve the many needs of the deaf is not limited by convenience, but may occur at any time of the day or night. Because of her, many deaf and hearing impaired people will enjoy richer lives."

The Jefferson Awards program is made possible by the American Institute for Public Service, founded in 1972 to honor the highest ideals and achievements in the field of public service in the United States.

Through the Jefferson Awards program, the American Institute recognizes the unique dedication, sacrifices and accomplishments of individuals serving the American people and strives to attract new, young leadership into public service.

Ogden College of Science, Technology and Health

OFFICE OF THE DEAN
Dr. Charles Kupchella, dean, was re-elected to another term as secretary-treasurer of the Kentucky Science and Technology Council and elected to the Board of Trustees of the Kentucky Chapter of the Nature Conservancy at the annual membership meeting. He spoke on "The Environment in the General Education of College and University Students" at the meeting of the Volusia County Medical Society in Daytona Beach, Fla. and to the Medical Society on "Green is Coming: The Rise of Environmentalism in America". He lectured on "Cancer Risk Assessment" as part of the Halifax Medical Center Tumor Conference.

BIOLOGY
Dr. Larry N. Gleason presented a paper on "Adaptive Mechanism of Reproduction in the Fish Parasite Pomphorhynchus Bulbocollis" at the 56th annual meeting of the American Society of Parasitologists at the University of Wisconsin, Madison, last month.

Dr. Joe E. Winstead presented the results of research conducted with Dr. Robert Stewart of Delta State University dealing with the accumulation of sulfur in the wood tissues of shortleaf pine trees.

COMPUTER SCIENCE
Dr. Kenneth Modisitt, professor and department head, was invited lecturer in the Department of Computer Science and Engineering at the University of Science and Technology, Beijing, People's Republic of China in June. His lectures were on software engineering, expert systems and computer-based learning.

A joint communiqué was signed related to further cooperation involving visiting scholars, Chinese graduate students and mutual research.

The first visiting scholar in computer science, Associate Professor Tong Long En, arrived on campus last month for a six-month research appointment in artificial intelligence.

Dr. Darleen Piford presented "Artistic Creativity and Software Engineering in a Computer Graphics Programming Project" at the 29th ACM Southeast Regional Conference at Auburn University.

Dr. James Grimm and Neale Chumbler, a graduate student, presented a paper, "Durkheimian Echoes in Network Analysis of Professional Relationships at the annual meeting of the Southern Sociological Society. Grimm spoke on "Future Employment Trends" at the annual spring conference of the Kentucky Intergovernmental Personnel Association at Barren River State Lodge.

Dr. John Faine presented "Evaluating the Drug Abuse Resistance Education (DARE) Program at the Second Annual Conference on Evaluating Drug Control Initiatives, National Institute of Justice, in Washington, D.C. in July. With Chris Ringwalt of the Research Triangle Institute, he conducted a workshop, "Evaluation Research: Where We Stand" at the Fourth Annual Conference of the National DARE Officers Association in Winston-Salem, N.C. Last month he presented workshops in Louisville sponsored by the Office for a Drug-Free Kentucky on "Alcohol and Other Abuse" and "Ongoing Program Evaluation of the DARE Program."

Dr. James Grimm and Neale Chumbler, a graduate student, presented a paper, "Durkheimian Echoes in Network Analysis of Professional Relationships at the annual meeting of the Southern Sociological Society. Grimm spoke on "Future Employment Trends" at the annual spring conference of the Kentucky Intergovernmental Personnel Association at Barren River State Lodge.

Carol Wilson had a poster session at the 29th ACM Southeast Regional Conference at Auburn on "Design, Implementation and Evaluation of a C5 Laboratory Course.

Student Affairs

CAREER SERVICES CENTER
Becky Bennett, career specialist, was elected vice president-president elect of the Cooperative Education Association of Kentucky in June. She is a past secretary of the organization and is recipient of the Coordinator of the Year Award from the CEAK.

University Libraries

LIBRARY PUBLIC SERVICES
Becky Leavy has been elected vice president for membership of Phi Delta Kappa.

Dr. Marvin Leavy presented "The Department of Sociology and the Libraries of the University of Chicago in the Early Years: An Elusive Connection" at the Cheirop Society (History of the Behavioral Sciences). He also has been appointed to the Reference Books Bulletin Editorial Board of the American Library Association.
