They'll soon be in place—computers on every desk of faculty, as WKU President Thomas Meredith promised. Last fall, the University's Board of Regents approved a plan initiated by Dr. Meredith to provide the computers to faculty. "We are working on a plan to place a computer on every faculty member's desk," Dr. Meredith announced to the University's Board of Regents, and then to the faculty and staff at their annual meeting. "In an information-driven society, technology is no longer a luxury; it is a necessity. In this time of budgeting constraints, we are pleased the University could provide the resources necessary to give our faculty some long-needed basic equipment," Dr. Meredith said.

Dr. Charles Anderson, assistant vice president for technology and telecommunications, reports installation is currently underway for the computers on desks of faculty members who have requested a computer. "A committee was appointed, and they did a very thorough assessment of what faculties' needs were," Anderson said.

Two kinds of computers are being installed, a 486DX33 which is a PC compatible, and a Macintosh Centris 650, Anderson said. Computers were to be in place by the opening of this semester, but delays actually worked in the University's favor budget-wise, because over the summer prices on the 486's fell by $400 each, and the Apples dropped by $770 each, "resulting in a $77,000 savings," Anderson said.

Margaret Cline of the Microcomputing Support Center on campus is overseeing placement. Anderson says all computers come with operating systems which include word perfect and a software site license to provide PC products. He says he hopes eventually the University will be able to provide faculty with accessories they may need, such as printers, modems, depending upon their individual needs.

Members of the committee appointed to plan the project of putting computers on every faculty desk are:

Charles Anderson, Robert Baxter, Mike Brown, Margaret Cline, Chuck Crume, Richard Hackney, Linda Johnson, Leroy Metze, Ken Modesitt, John Oakes, Robert Prickett, James Ramsey and Jay Sloan.
Line's busy at WKU Alumni Phonathon

More than 37,000 Western Kentucky University alumni will be receiving telephone calls from Western students during the next five weeks as the 13th annual Alumni Annual Fund Student Phonathon gets underway.

The goal for this year, with its theme of "Western: A Great Investment," is $200,000, said Ron Beck, Phonathon director. Calling began Sept. 19 and continues Sunday through Thursday through Oct. 21.

"We've shown growth each year in the Phonathon as more alumni have come on board and decided to make a gift," Beck said. "And many of our alumni have increased their gifts each year as they're called by our students. If fact, we're at the point where some alumni are looking forward to and expecting to hear from one of our students, inviting them to make their annual gift.

More than 700 students, 32 callers a night, will be involved in telling alumni the Western story and soliciting their support, Beck said.

"The value to the University is far beyond the dollars, as important as the dollars are and we really need our alumni to support the University now," he said. "To have that contact, to give the alumnus an opportunity to personally interact with a student who is here in college today is significant."

The fact that so many students are willing to volunteer time for this project is also significant, Beck said.

"Our students are responsible, our students are excited and they're looking forward to the opportunity to speak to alumni across the state and across the nation and to tell them the story about Western Kentucky University today and to invite their private support."

In the 12 previous Phonathons, more than $1 million has been raised. Last year callers raised a record $177,000 in a record 4,400 gifts.

Donors can make unrestricted contributions to the University or they can earmark the funds for a specific department or project, Beck said, adding this will be the first year that all academic departments will be represented.

"We have an opportunity for each of our alumni to support the specific academic area that they're involved in and many of our students will be representing the various academic departments as they call for these gifts," he said.

"This has become a primary means by which each of our academic departments raises money that will be used for some of the very important activities that go on in their departments that the budgets are just not able to take care of right now."

Beck said many departments have been able to computerize offices and buy laboratory equipment and instructional supplies with Phonathon funds.

Scheduling more than 700 volunteers is one of the more difficult tasks organizers face, according to Gretchen Ploch, Phonathon vice chairman.

"It's a lot of work," the Louisville senior said. "You really learn a lot of organizational and communication skills."

Ploch was a caller for Alpha Omicron Pi sorority last year.

The personal contact between students and alumni is key to the Phonathon's success, Beck said.

"Obviously the best way to solicit anyone for a gift is personally and when you can't personally solicit, the next best way is to make a phone call and invite the person to give," he said. "That is a much more effective and personal way of communicating with a perspective donor than to just do it through direct mail. We try to limit our phone calls to once a year and we try to be respectful of our alumni and their personal schedule and if there is a better time to call back, we will."

On Campus

On Campus is published biweekly on Wednesdays during the academic year and monthly during the summer by the office of University Relations Sheila Elson, Editor, Fred Hensley, Director of University Relations.

On Campus does not represent any special interest group. Opinions are stated in any copy, material is attributed. We reserve the right to accept or reject any material.

Minority enrollment at WKU is up

The percentage of African-American students attending Western Kentucky University is up, according to preliminary enrollment figures released to the Council on Higher Education.

African-American students make up 6 percent of the WKU enrollment for the fall 1993 semester, the highest percentage since 1987, said Registrar Freda K. Eggleton. There are 934 African-American students enrolled this fall, a 5.9 percent increase over the 1992 fall semester enrollment of 882, she said.

Overall, preliminary enrollment for the 1993 fall semester is 15,400, including 10,800 full-time students and 4,600 part-time students. That figure is down 2.3 percent for the final 1992 fall headcount of 15,750.

The drop was anticipated because of a smaller number of high school students graduating this spring.

"The University had planned course offerings for an anticipated enrollment of 15,400 for the 1993 fall semester," Eggleton said. "We are pleased that our actual enrollment so closely met our expectations."

Full-time graduate enrollment is also on the rise, up 12 percent over last fall, she said. There are 477 full-time graduate students enrolled compared to 418 last fall.

Flu Shots at Student Health Service

The Student Health Service will administer flu shots Oct. 1, 6, 20 and 27 between the hours of 8:30 a.m. and 1:30 p.m. and 3:30 p.m. Cost is $5 for students, $10 for faculty and staff.

Wanted: Computer Instructors

Continuing Education is looking for instructors to teach microcomputer applications with the public and with WKU employees.

Classes will be taught in the new AT & T computer lab (see story, page 5) at the Institute for Economic Development on Nashville Road.

If you’re interested, contact Dr. Sandra Webb, 4137, or send a resume to Continuing Education, 1536 State St.
WKU’s Pankratz to head KERA assessment

A Western Kentucky University educator who helped lay the groundwork for the Kentucky Education Reform Act (KERA) has been chosen to lead a group created by Gov. Brereton C. Jones to provide the taxpayers of Kentucky with evaluation of KERA. Dr. Roger Pankratz will be the first executive director of the Kentucky Education Research Assessment Foundation which has been charged with conducting objective long-term research to determine the value and effectiveness of the Kentucky Education Reform Act.

Pankratz has served as WKU’s associate dean for instruction and development in the College of Education and Behavioral Sciences since 1987, and he also directs Western’s Center for Excellence in Education Reform, which he helped design. He has been a member of Western’s faculty since 1974.

In teacher education he was instrumental in the development of Kentucky’s Beginning Teacher Internship Assessment Program. During the 1980s he worked on developing a career ladder pilot program which was a system to reward the state’s excellent teachers. He is also active on the national level. He served as a consultant to the American Association of Colleges of Teacher Education (AACTE) for the past four years, working with more than 30 institutions across the country developing a knowledge base in teacher education.

Pankratz is a member of the Board of Examiners for the National Council for the Accreditation of Teacher Education. The KERA Foundation Chairman, Ben Richmond, president of the Louisville Urban League, says: “Dr. Pankratz brings to this position the mix of skills, experience and sensitivity that we were looking for. He’s an experienced educator who’s insistent about achieving results for all Kentucky children. He will be willing to speak frankly about problems as we evaluate how school reform is doing in Kentucky.”

The KERA Foundation Chairman, Ben Richmond, president of the Louisville Urban League, says: “Dr. Pankratz brings to this position the mix of skills, experience and sensitivity that we were looking for. He’s an experienced educator who’s insistent about achieving results for all Kentucky children. He will be willing to speak frankly about problems as we evaluate how school reform is doing in Kentucky.”

He’s an experienced educator who’s insistent about achieving results for all Kentucky children.”

Ben Richmond, Chair, KERA Foundation

The Foundation, which was to become completely independent of government as a non-profit corporation, has received funding from the Annie E. Casey Foundation of Greenwich, Conn., and officials say additional foundation support will be sought.

Other officers of the KERA board include Vice Chair Gary Dodd, Toyota Motor Manufacturing; Treasurer David Grissom of Mayfair Capital; and Secretary Robert F. Sexton of the Prichard Committee.

Board members, appointed by the governor, include: Lisa Bellando, president of Churchill Weavers, Berea; Judith Clabes, The Kentucky Post; John Hager, The Owensboro Messenger-Inquirer; Doug Kuelpman, vice president, United Parcel Service; Judy Thomas, Ashland Oil and Joe Wright of Harned, Ky.

Richmond says he recognizes the challenge the Foundation faces. “We’re a group of private citizens asked to look out for citizens across the entire state. We have to learn a lot and find the best expertise across the nation to help with our research.”

Ben Richmond, Chair, KERA Foundation

WKU Computer Science Program gets accreditation

An option in the WKU computer science program has been accredited by the Computer Science Accreditation Commission (CSAC) of the Computing Sciences Accreditation Board (CSAB). The accreditation of the computer science program option in scientific/systems came during the CSAC annual accreditation meeting in Dallas.

The board is a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the U.S. Department of Education, according to Dr. Frank Conley, interim head of the Computer Science Department. “That lends credibility to the accreditation process,” he said.

“It’s kind of a mark of quality and says that the program meets the minimum qualifications,” Dr. Conley said. “The department made quite a few changes to get in line with this.”

About 150 computer science departments in the nation have been accredited since the program started in 1985, with 15 to 20 departments accredited each year.

University Police are accredited

The Western Kentucky University Police Department is the first university police department in Kentucky to receive accreditation.

The WKU Police recently completed a study and review by a committee of Chiefs of Police from across the state. To receive accreditation, departments must meet professional police department standards.

Chief Horace Johnson and Captain Richard Kirby received the accreditation Thursday at the Annual Convention of the Kentucky Association of Chiefs of Police in Louisville. The association fosters professional law enforcement in Kentucky.

Only four police agencies in the state are currently accredited - Jefferson County, Jeffersontown, Bowling Green and WKU.
Academic Affairs

CENTER FOR TEACHING AND LEARNING

Ed Counts' animated film, Joey Learns to Fly, received an award in the 1993 Chicago International Children's Film Festival. It will be screened along with other award-winning films Oct. 8 on the opening night of the Festival at Facets Multimedia in Chicago. Funds for production of the five-minute film consisting of 3249 drawings were provided by Kentucky Educational Television which has aired it several times since its completion in June 1992. Joey Learns to Fly can also be seen on WKYU-TV and is available for check out from the University Film Library, Media Services.

Arts, Humanities & Social Sciences

COMMUNICATION AND BROADCASTING

Dr. Randall Capps, head of the department, received a grant from the Quebec Government to continue his research on socio-technical systems in Quebec.

Sally Ray presented Organizational Legitimacy and Post Crisis Intervention: A Comparative Case Study of the National Transportation Safety Board and the Airline Industry at the Seventh Conference on Corporate Communication at Fairleigh Dickinson University in May. Ray and Randall Capps, presented Male and Female Perceptions of the Effects of Women in a Manufacturing Environment.

HISTORY

Dr. Robert Antony, professor of history, presented Aspects of the Socio-Political Culture of South China's Water World, 1740-1840, at the annual World History Conference in Honolulu, Hawaii, in June.

Education and Behavioral Sciences

CONSUMER AND FAMILY SCIENCES

Dr. Joyce Randell's paper, Strengthening Issues-Driven Research Experiences in Undergraduate Coursework successfully judged as the 1993 Outstanding Paper Award at the annual Technical Conference of the Association of Home Equipment Educators at Ohio State University.

Science and Technology

GEOGRAPHY AND GEOLOGY

Christopher Groves presented Network Modeling of Developing Karst Aquifers: Selective Enlargement of Competing Flowpaths at the national meeting of the American Geophysical Union in Baltimore, Md., in May and in August at the national meeting of the National Speleological Society in Pendleton Ore.

Michael Trappaslo presented Food Preparation Activities and the Microclimate Within Mammoth Cave, Ky. and chaired a session at the 11th International Congress of Speleology in Beijing, PR China in August.

MATHMATICS

Tom Richmond gave an invited talk at a special session at the Ninth Summer Conference on General Topology and Applications at Slippery Rock University.

Dr. Mark Robinson spoke on Orthogonal Spline Collocation Solution of Nonlinear Schrodinger Equations at the Mathematics of Computation 1943-1993 Symposium at the University of British Columbia in Vancouver, British Columbia, Canada.

University Libraries

LIBRARY PUBLIC SERVICES

Fina Simpson gave a presentation at ceremonies surrounding the dedication of a mural honoring Antonio Maceo, the Cuban revolutionary for whom the town of Maceo, Ky. is named.

Note: Hot Off The Press, as the title indicates, includes recent publications by WKU faculty and staff. Send items addressed to Hot Off The Press, %On Campus, Office of University Relations.

Jim Wayne Miller's His First Best Country has been released as a novel (Aug. 22, 1993). Miller's play by the same title was presented last year at Horse Cave Theatre as part of the Theatre's Kentucky Voices new play development program.

Barton C. White, associate professor, Department of Communication and Broadcasting, has just had The New Ad Media Reality: Electric Over Print, published by Quorum Books (the Greenwood Press). The book is an outgrowth of the advertising/marketing seminars White has presented to professional sales/management groups of state broadcasting associations nationwide.
WKU will host ninth history conference

WKU's History Department will host the ninth annual Ohio Valley History Conference Friday and Saturday, Oct. 15 and 16. Keynote speaker will be Dr. John David Smith, Alumni Distinguished Professor of History at North Carolina State University, a leading scholar on African American history and the American South and who has published widely. He will speak Friday evening at 7 o'clock in the Regency Room of Howard Johnson Hotel. He will speak on "How I Became a 'Doubting Thomas'. Methodological Problems Involved with Local Black History Research." Smith's lecture is part of a manuscript from a book he is currently working on, Black Judas: William Hanahel Thomas and "The American Negro," an intellectual biography of Thomas, an Ohio native and author of The American Negro, 1901, who "typifies millions of black men and women who have been overlooked by historians because their achievements have not been judged noteworthy by conventional standards and because they reportedly left such sparse documentary records," says Smith, who has uncovered extensive records over the past seven years which he says establish Thomas "as a leading black activist and black nationalist during the late 19th century.

Smith's books also include An Old Creed for the New South: Proslavery Ideology and Historiography, 1865-1918, a 1991 paperback issue by Georgia Press and he has edited Anti-Black Thought 1865-1925, an 11-volume anthology of Racist Writings in Facsimile.

Western's history department began the Ohio Valley History Conference eight years ago, holding the first in 1985. The conference moves to Eastern Kentucky University and then to Murray State University, before returning to WKU.

Historians attending the OVHC present scholarly papers on various topics, but a majority are delivered on regional topics. Some of this year's topics include: Women in Eastern Kentucky, Twentieth Century Southern Political Leaders, Kentucky Towns in Transition, plus others.

For more information about the conference, call Marion Lucas, 5736.

A T & T gives computer lab to Economic Development Institute

Western Kentucky University's Institute for Economic Development and Public Service will be awarded a $117,000 networked computer lab by AT&T.

Nominated by AT&T Network Systems, Western is among 61 institutions of higher education in the United States and overseas to receive computer gifts totaling some $7 million this year through the AT&T University Equipment Donation Program, which provides computers and related data-networking products for use in research, curriculum development and teaching.

Dr. Steven House, director of Western's Institute for Economic Development and Public Service, said the computers will be used to establish an electronic classroom to train business leaders, the general public and employees at Western in the basic use of computers and software.

The electronic classroom will be a part of a larger facility that will encompass state-of-the-art telecommunications, teleconferencing and video production, House said. That facility will eventually be located in the Bowling Green Center. Renovation of the center should be complete in March.

"The Institute for Economic Development and Public Service is dedicated to using state-of-the-art telecommunications — data networking, video and teleconferencing — to extend the University's academic resources to meet the educational needs of today's workers," House said.

"This AT&T equipment will support the Institute's mission to meet the economic development, continuing education and job-training needs in South Central Kentucky." The 20 NCR computer terminals will be linked to the main campus via fiber opt cable and integrated services digital network lines provided by South Central Bell.

WKU President Thomas C. Meredith said the computer gift will bring the University's public service mission to a new level. "This equipment will keep Western on the cutting edge," Dr. Meredith said. "It will be a very important addition to our facility in the Bowling Green Center.

House said he learned about AT&T's program after the Institute received a grant from South Central Bell for a telephone system for the Bowling Green Center.

"We're building one program on another," he said. "We started with the base of the new facility, then received the grant from South Central Bell and now we have the computer system from AT&T.

J.M. Mauriello, regional vice president for AT&T Network Systems in Atlanta, said AT&T is "pleased to contribute the computer equipment to Western Kentucky, because it represents a shining example of how today's telecommunications technology can be used to enhance Kentucky's economy and quality of life."

Universities and colleges earlier this year were invited by AT&T to submit competitive proposals for instructional or research projects using NCR computer products in computer science, engineering, environmental sciences, health care, business, liberal arts and education.

NCR is a subsidiary of AT&T.

The AT&T University Equipment Donation Program is among a range of programs that reflect AT&T's significant commitment to improving education. It is complemented by direct cash grants and numerous innovative projects at all levels, from kindergartens through graduate school.

AT&T Network Systems is the unit of AT&T which manufactures, markets, installs and services telecommunications equipment used by regional telephone companies such as BellSouth.

The Office of University Relations needs news tips about faculty activities, achievement and awards for external press use. Call Bob Skipper (4255).
At the Gallery: ‘Recent Finds’

On exhibit at the Ivan Wilson Fine Arts Gallery through Oct. 15 is Recent Finds from the Forgotten Works by WKU Art Professor Michelle D. Coakes. She shows approximately 20 stoneware pieces that are part of an extended study of the stacked vessel and teapot forms. Coakes alters wheel-thrown forms by changing their special shapes and combining several pieces together into one new form. Shown for the first time will be her explorations using a black colored clay, some of which will be left unglazed.

The artist was one of approximately 30 Americans chosen for the 1992 Fletcher Challenge Ceramics Award at the Auckland Institute and Museum in New Zealand. In addition to numerous regional exhibitions, her work has been shown nationally, including shows at the Everson Museum of Art in Syracuse, N.Y. and the Creative Arts Workshop in New Haven, Conn.

The Gallery is located on the second floor of the Ivan Wilson Fine Arts Center. Hours are weekdays from 8:30 a.m. until 4:30 p.m. and weekends by appointment.

Ah, yes! Yeast, Fungi!

Pretzels, mold, root beer and fungus were some of the materials Biology Professor Larry P. Elliott studied during a summer workshop at Boston University’s School of Education.

Elliott recently participated in Microcosmos, a science education program that integrates biology and life science through hands-on classroom activities. Established in 1987 by Boston University professor Douglas Zook and funded by a $1 million grant from the National Science Foundation, Microcosmos encourages teachers to incorporate themes about microorganisms — microscopic animals and plants — into their life science curricula.

By conducting experiments with yeasts, molds and fungi — as well as such microorganism-packed edibles as yogurt, root beer and pretzels — teachers learn simple yet effective ways to demonstrate to their students that the world of science and microbes is a part of their daily lives.

“This is a method of teaching science to high school, middle school and grade school students using microbes as the entry in making it interesting,” said Elliott, who teaches microbiology.

“Most people don’t know much about microbes, and what they have heard is that they’re bad,” he said. This teaching method helps enlighten the students to the beneficial aspects of microbes while “turning them on to science,” he said.

This is the second Microcosmos workshop Elliott has attended, and he has presented two workshops to elementary and secondary high school teachers. He said he is currently working on a grant to conduct another workshop this past summer.

CONGRATULATIONS TO
OUR ‘NAME THE STREET CONTEST’
WINNER:

Jerry Nole
of Facilities Management

Whose name was drawn from the entries choosing

Big Red Way

Jerry won 2 single admissions, 1 day Opryland tickets and 1 night stay at the Hampton Inn, Nashville. All others who chose the winning name will receive a certificate. There were more than 800 entries!
Homecoming 1993
It's 'Much Ado About Something!'

Thursday, September 30
8 p.m. 
Dwight Yoakam Concert
E.A. Diddle Arena
$25/$19.50

Friday, October 1
7 p.m.
Hall of Distinguished Alumni
Dinner
Garrett Conference Center Ballroom
Join some of Western's most distinguished alumni at a dinner in their honor. For reservations, contact the Office of Alumni Affairs at 4395.

7 p.m.
Big Red's Roar
Fine Arts Center Outdoor Theatre
The Homecoming Queen finalists will be announced. Also featured will be the Big Red Band, WKU Hilltopper football team and coaches, cheerleaders, the WKU Toppersettes and Big Red. Special guest will be comedian Carrot Top. In case of rain, the event will be in Van Meter Auditorium.

Saturday, October 2
Festival of Friends
Downing University Center
South Lawn
2 p.m.-4:30 p.m.
The 5th annual Festival of Friends will once again come alive with a festival of activities including live entertainment, food and tailgating!

Saturday Activities
"W" Club
11 a.m.
Brunch - Diddle Arena Lobby. Make reservations through the Office of Athletics at 3542.

Allied Health Alumni Brunch
12:30 p.m. - 2 p.m.
Second floor lobby. Academic Complex - call 2427 for reservations.

Department of Nursing
10:30 a.m.
Brunch - contact the Nursing Department for further information and reservations. 3391.

Department of Journalism
11 a.m.
Brunch - Garrett Conference Center Ballroom
Call 2633 for further information and reservations.

Department of of further information.

ROTC
2 p.m.
Alumni will gather at the ROTC tent in the Festival area.
Call 4293 for more information.

Department of Industrial Technology
10 a.m. - 2 p.m.
Open House in the lobbies of the Environmental Science and Technology Building and the Industrial Education Building.

Department of Agriculture
1 p.m.
Agriculture Alumni Luncheon. Under the "Big Top" tent on the south lawn of DUC. If inclement weather, the luncheon will be held in Diddle Arena. For reservations, call 3151.

Football Kick-Off
5 p.m.
WKU Hilltoppers vs. Jacksonville State
Half-time entertainment will include the Big Red Band and the presentation of the Homecoming Queen and her court.

Sunday, October 3
Department of Music
3 p.m.
Van Meter Auditorium
The University Choir and Chamber Singers will present a "Homecoming Choral Concert."

Lost River Cave Valley Heritage Harvest
Saturday, October 2 and Sunday, October 3
8 a.m - 4 p.m. (both days)
Tickets - $5.00 per person - available at the door
Kids' activities include: hunting for a "needle in a haystack," have your picture taken with the Jesse James Gang or Smokey the Bear!
The there were a flower and vegetable show on the old dance floor. Food and beverages will be sold at the event.

Ad Club
1 p.m.
"Munch and Meet"
Advertising alumni
Gordon Wilson, Room 314

Department of Journalism
3 p.m. - 4:30 p.m.
Journalism tent - Festival area.

Consumer and Family Sciences
11 a.m. - 1 p.m.
Brunch
Academic Complex, Room 213
Call 4352 for reservations and

Minority Student Support Services
2 p.m. - 4:30 p.m.
Alumni will gather at the MESS tent in the festival area.

10 p.m.
Black Alumni Dance
Knights of Columbus Hall
911 Searcy Way

Department of Theatre and Dance
3 p.m.-4:30 p.m.
Reunion at the Potter College tent in the Festival area.
